255978

Withings ScanWatch Nova Brilliant – Premium hybrid smartwatch with medical-grade ECG, irregular heart rhythm detection for atrial fibrillation, and up to 30-day battery life. Track your heart health 24/7.

Colour

PRODUCT DETAILS

**Medical-Grade ECG**
Withings ScanWatch Nova is a medical device that measures, transfers, records, and displays lead I of an ECG. It calculates the heart rate and detects the presence of AF or sinus rhythm on a classifiable ECG waveform.

**Irregular Heart Rhythm Notification**
Withings ScanWatch Nova can look for signs of atrial fibrillation. Every 10 minutes, your watch looks for irregular patterns in your heart rhythm in the background. As soon as an irregular heart rhythm suggestive of atrial fibrillation is detected, you'll be notified on your device and on your phone.

**Up to 30 Days Battery Life**
Powered internally by a rechargeable lithium-ion battery, the ScanWatch Nova delivers up to 30 days of typical use on a single charge.

**OLED Digital Display**
Features a crisp OLED screen on the watch for viewing your health data, notifications, and ECG results at a glance.

**Quick Swap Band**
Easily change your wristband to match your style with the quick swap band system.

**What's in the box**

- ScanWatch Nova Brillant
- Fluoroelastomer wristband
- Charger and cable
- Hammer
- Pin punch
