

Milo Action Communicator - Solstice White

251257

Milo revolutionizes the way we communicate on outdoor adventures. Forget about push-to-talk walkietalkies that only allow one person at a time to speak. Milo lets you and your friends enjoy hands-free group voice chat while on the move. No phones or Wi-Fi needed. Milo creates its own secure MiloNet™ mesh network so that everybody in the group can share the moment, in the moment.

Colour

PRODUCT DETAILS

Waterproof and rugged
Milo is designed to meet the challenges you face on all active adventures. It is impact resistant, dust- and waterproof and can be fully submerged in water.

The unique Milo clip
Designed to be worn on your body, the unique Milo clip system uses a magnet to snap in your Milo and trigger a secure mechanical lock that keeps Milo in place even on the roughest rides.

Multi-way voice
All members in a group can speak naturally, including talking over each other.

Advanced wind noise reduction
Six digital low-distortion microphones and sophisticated wind- and background noise reduction deliver clear voice in all conditions.

All day battery
The integrated rechargeable lithium polymer battery provides a full day of use under normal conditions, even in cold weather. If needed, you can use a portable power bank to charge Milo while still talking to your group.

Milo Mesh Network
Your Milos create a secure mesh radio network. No Wi-Fi or phone signal needed. The range between two grouped Milos in clear terrain is usually at least half a kilometer (third of a mile), often more. Range is affected by many factors. The MiloNet™ network extends your group's overall range when the group spreads out.

Private and secure
Milo creates an encrypted network for your group. That means you don’t need to pick a channel, and nobody outside your group can listen in on your conversations.

Headset optional
Milo can be used with or without a headset. Connect with your favorite Bluetooth or wired headset for that in-ear sound experience.

Specs

Product Attributes

EAN:	0850025239127
Manufacturer number:	MC-W-01-E
Product weight:	0.07 kilograms

Network

MiloNet™ proprietary ad-hoc mesh network

Dual ISM-band sub-GHz and 2.4 GHz

MiloNet™ extends group range - groups of 4

Battery
