

Silk´n Facial LED Mask 100

256777

Elevate your skin with the Silk'n LED Face Mask 100, harnessing red, blue, yellow, and purple LED light to combat aging, redness, and skin imperfections.

PRODUKTDETAILS

In LED light technology, light-emitting diodes (LEDs) are used to emit different colours of light to target specific skin issues. Energy is delivered directly to the skin cells, initiating various natural healing and regenerative processes from within.

Why This Advanced Technology Changes Everything:

- Red Light (633nm): Reduces fine lines and wrinkles, stimulates natural collagen production, and helps to improve overall blood circulation.
- Blue Light (463nm): Actively reduces blemishes and skin imperfections to promote a clearer, more balanced complexion.
- Yellow Light (592nm): Improves skin hydration, helps retain moisture, and deeply soothes dry and sensitive skin types.
- Purple Light (463-633nm): Delivers dual anti-ageing and blemish-reduction benefits to dramatically improve the skin's vital health, radiance, and clarity.

Spa Luxury at Home:
No need to step out our premium LED facial mask not only helps you achieve a revitalised, youthful complexion, it can also easily brighten your day. Just unwind, lie back, and revel in the beauty of radiant skin, all from the comfort and convenience of your own home.
