PRODUKTDDETAILS

YOUR CARDIOVASCULAR DATA IN AN INSTANT

Medical-grade blood pressure measurement (systolic/diastolic) in seconds. Step-by-step instructions on a color screen: simple for an easy reading of results.

2-IN-1 MEASUREMENT

Certified medical blood pressure monitor with a 30-second ECG to detect Atrial Fibrillation (AFib), the most common heart rhythm abnormality.

INTUITIVE DESIGN

Intuitive and simple blood pressure monitor. 1-year battery life, large bright display, and comfortable cuff for a precise fit (adults 22–42 cm).

AUTOMATIC SYNC

Results synced via Wi-Fi and Bluetooth with the Withings app. Track your trends and share your data with your doctor (iOS & Android).

Key Features

- Blood pressure monitoring
- Atrial fibrillation detection*
- EasyTrack™ – Effortless guided measurement on a 2.8" color LCD screen, for precise blood pressure monitoring.
- TripleTrust™ – Three consecutive measurements to ensure a reliable and accurate reading, as recommended by healthcare professionals.
 - FlexiFit™ – Adjustable and detachable cuff, designed for comfort and optimal measurements. Available in standard size (included) and XL (sold separately).
 - Exceptional 1-year battery life – Set it and forget it: unrestricted monitoring for 12 months.
 - AutoSync+™ – Automatic sync via Wi-Fi, no smartphone needed.
 - 1 free Cardio Check-Up* included in your Withings+ trial month

Take control of your heart health

Monitor your systolic and diastolic blood pressure and detect atrial fibrillation via an ECG

measurement*.

Access instant interpretation of your results

Your results are displayed with color coding directly on the high-resolution screen, based on ESC (European Society of Cardiology) standards.

Easily share your results with a healthcare professional

in just a few taps via an exportable report.

Keep your loved ones informed about your health

by sharing your blood pressure history instantly.

Access your full data history

thanks to automatic sync via Wi-Fi or Bluetooth with your app.
