Momcozy Disposable Milk Storage Bag, x50

254230

These special bags with double airtight closure are perfect for optimally preserving breast milk and keeping your precious milk safe for your baby.

Thanks to their sturdy design, the bags stand on their own and display the milk temperature. You can also write down important data on it. And best of all, they are BPA-free, so you can feel completely comfortable.

PRODUCT DETAILS

Size X120, X50

Intelligent temperature display

The temperature-dependent discoloration of the bags allows parents to keep an eye on the milk temperature at all times. Purple indicates cold milk (< 36°C/96.8°F), blue indicates the optimal feeding temperature (36-40°C/96.8-104°F) and white indicates hot milk (> 40°C/104°F). So you always have the right temperature under control!

Robust Double Closure

Our bags are equipped with double side seams that effectively protect the contents and freeze breast milk safely. Simply press the shutter with your fingertips until you hear an audible clicking sound. Pre-sterilized and BPA/BPS-free bags ensure that you can build your milk bank safely.

Contamination protection

The special separation between milk inlet and outlet prevents any contamination. Open the sealing strip when pouring the milk and simply cut along the cutting line when breastfeeding – it couldn't be easier!

Space-Saving Design

The breast milk storage bags can be frozen in a super flat or upright position to save space. This function allows the milk to be thawed or frozen quickly. Note: The filling quantity should not exceed 6 ounces. Once filled, release the air from the bag and reheat to 104°F (40°C) after thawing.

Perfect size for new parents

The Momcozy breast milk bags are optimally sized to make it easier for new parents to express and store milk during the first months of life. So you always have the right solution at hand!
