Mill Gentle Air WiFi oil filled radiator 1500W, WiFi controlled

251974

With Mill WiFi heaters, you can easily control your heaters from your smartphone ensuring comfortable temperatures at any time without wasting electricity. An oil-filled radiator never looked better – if we dare say so ourselves! The Mill Gentle Air has an elegant, modern design, and resting on a stand it looks as if the heater is gently floating in the air.

PRODUCT DETAILS

With Mill WiFi heaters, you can easily control your heaters from your smartphone ensuring comfortable temperatures at any time without wasting electricity. An oil-filled radiator never looked better – if we dare say so ourselves! The Mill Gentle Air has an elegant, modern design, and resting on a stand it looks as if the heater is gently floating in the air. The portable, stylish heater is quiet and safe to use without supervision. Living up to its name, the Mill Gentle Air is a gentle heat source that neither burns dust nor dries out the indoor air. With its unique closed shape, it spreads the heat around the room a lot faster compared to traditional oil-filled radiators. This makes it heat up a room 29% faster, as the closed shape forces the hot air to rise faster, distributing the heat more efficiently. We call it Mill Heat Boost Technology.

In the Mill App, you can program the temperature to automatically adjust to your daily routines, which ensures everyday comfort and saves both your wallet and the environment from unnecessary expenses and electricity usage. By using the app, you can control several houses and as many heaters as you like, no matter where you are in the world. As a result, you will always come home to a cozy, comfortably warm house or cottage. Doesn't that sound amazing?

Features

- Seamless and easy connection with Bluetooth that automatically connects the device to your WiFi-network, regardless of the type of router you have
- Predictive heating – the heater will heat the room so that the desired temperature is reached at a specific time. The heater learns how fast/slow the room goes up/down in temperature over time. That way, it will know when to start heating to achieve your desired temperature at the time you have scheduled in the app.
- Child safety lock – for safe usage
- Commercial lock for landlords
- Open window function that switches off the heater automatically when a window is opened
- Possibility to let Mill Sense override the heater's temperature sensor – allowing more precise

- temperature control
- OTA (Over the Air) updates allowing new exciting features to be added to the software

Other features

- 1500W
- Mill Heat Boost Technology
- Beautiful design
- Tip-over switch (the heater turns itself automatically off if it tips over)
- Over heating protection (the heater will turn itself off if it gets over heated)
- WiFi + app control
- Aluminium feet for that extra quality
- 3 heat settings: 600/900/1500W
- Size: 34,4 * 26,1 * 65,6 cm (Width * Depth * Height)
- Model name: OIL1500WIFI3
