

Véritable Express seed starter kit

255168

Start seedlings early with the Express seed starter Kit, designed for Véritable indoor gardens. The kit includes 4 baskets, 4 wicks, and 16 growing cubes. It offers pest protection, precise hydration, and a controlled environment to optimize germination year-round.

PRODUCT DETAILS

Optimize your seedlings and cuttings with our innovative technology

Get ready for bountiful, healthy harvests with the Express seed starter Kit, specially designed to fit into Véritable self-sufficient indoor gardens.

Thanks to cutting-edge technology, this solution lets you start your seedlings and cuttings with ease. You no longer have to worry about external conditions, pests or the vagaries of the weather.

Your Véritable indoor kitchen garden lets you grow your plants in the best possible conditions, all year round!

Save time before the sun shines

The Express seed starter Kit lets you start your seedlings earlier than usual.

No need to wait for favorable outside temperatures. Thanks to the Véritable indoor growing system, you have total control over the environment in which your seedlings grow, speeding up their development.

Véritable seedling kits allow you to grow 4 growing cubes per basket. Grow indoors to protect germination before replanting outdoors.

Pest Protection

One of the main benefits of our system is pest protection. By growing your seedlings and cuttings in a closed, controlled environment, you avoid the attacks of birds, insects and diseases common to outdoor cultivation. This secure environment allows your plants to thrive in ideal conditions, without having to worry about pests.

Véritable Autonomous System: Innovative Technology

The Express seed starter Kit is designed to work optimally with Véritable self-contained indoor

vegetable gardens.

Thanks to advanced hydroponic technology, your seedlings benefit from the humidity, light and nutrients they need to grow.

This intelligent system simplifies your life, providing perfect conditions for your seedlings, with no extra effort on your part.

The seedling kit's culture cubes use the same proven technology as our Lingots for optimal germination.

A specific basket

The basket used for the seedling kits is different from the one used for classic Lingots.

- Firstly, it is shallower, to fit the dimensions of the growing cubes and give the seeds better access to light.
- Its flexible wick ensures even, efficient hydration of the 4 growing cubes.
- Its retractable base makes it easier to extract the growing cubes for easier handling when repotting, all with greater stability.
- Depending on the batch, the color of the basket may vary slightly from white to creamy white.

What's in the box

- 4 growing baskets
- 4 wicks
- 16 growing cubes
