PRODUCT DETAILS

Voice data call / video call

With 4G LTE and a built-in camera, myFirst Fone R1s lets you stay connected with your loved ones in real time. Make voice and video calls, send text messages, and share photos with the touch of a button.

GPS tracking with route history

myFirst Fone R1s uses advanced GPS, WiFi and GSM to help parents accurately and conveniently track their kids. Your child's travel history will be recorded at each set time.

Send text messages

Leave a quick text to your friends and family with our preset text.

Minimise distraction with Class Mode

Kids can stay on task with minimal interruptions during Class Mode. It's possible to set a specific time or day to mute the watch, with only the SOS capability still functioning.

Create your unique reminder recording

A new way to set up the reminder or alarm ringtone. Parents can also set up the wake up call or alarm by their own customised recorded voice message~

Send distress signals

Send distress signals through an integrated SOS button. Once activated, parents will receive an emergency location alert with a 30 seconds live recording of surrounding sounds.

Heart rate monitoring with High Heart-rate Alert

PPG HR monitoring is available on our watch phone. Parents can set high Heart Rate alerts remotely in the app. myFirst Fone R1s can detect child's Heart Rate while running & notify if it exceeds parent-set

BPM.

Customizable watch face with fun animated wallpaper
Preset with a selection of new animated wallpaper, if you don't like the new animated wallpaper, try to customize your own watch face with your selfie or photos sent from others in the chat room.

Improved water resistance rating
The improvement sustains better and longer water resistance. Tested in the lab certified with 1meter water depth for an hour.

Fitness goal achievement
The activity tracker shows your achievement and encourages the young one to achieve their daily target. Rewards with unique badges. Be active and have fun~
