

Jlab JBuds Wireless mouse, Black

252080

Get ready to take control with the JLab JBuds Wireless Bluetooth Mouse. With seven buttons, personalized profiles, and three connection options, this mouse offers full-sized functionality and flexibility. Ergonomically designed for maximum comfort, it also features silent clicks and a rechargeable battery. Program specific buttons through the JLab Work App to fit your favorite applications and easily switch between up to three user profiles.

PRODUCT DETAILS

PERFORMANCE IN HAND
The JBuds Wireless Bluetooth Mouse offers full-sized functionality with a personalized approach. With seven buttons and a comfortable feel, you have everything you need to reach WFH greatness, and everything you want to play your game, your way. And you can save up to three user profiles through our JLab Work App, so switching between your favorite functions and your top devices is only a click away.

FLEXIBLE CONNECTIONS
The JBuds Wireless Mouse is compatible with three—count ‘em, three!—device connection options. You can pair with nearly any type of device using Bluetooth 5.2, or USB. We hate pairing confusion too, so we made it super easy for you to switch between saved devices.

CUSTOM USER PROFILES
Through our JLab Work App, you can program specific buttons to fit how you like to use your favorite applications. And why choose? Paste your most used Excel formulas or paste the same text with a simple click of a button. With up to three unique profiles, you can easily switch between them depending on what you’re doing. Check out some example set-ups.

SCROLL YOUR WAY
Adjustable tracking allows you to change the sensitivity of your mouse so you can move at your own speed. Whether you like to click around on turbo or leisurely make your way down a page, the JBuds Wireless Mouse will adjust to the right pace for you.

COMFORT IN HAND
When you think about it, a computer mouse is kind of personal. After all, you might be holding it in your hand for almost eight hours a day. We thought about all the ways you need to use it and made sure to

design for maximum comfort and functionality. You might say ergonomic, we just call it designed for you.

QUIET CLICKS
We're very familiar with the looks you get from your newly appointed WFH colleagues, fellow café-goers, and napping pets when clicking gets out of hand. That's why we design all of our mice with silent buttons—so you can click away without raising any eyebrows (or ears).

RECHARGEABLE BATTERY
Who wants to go digging around looking for AAA batteries? We sure don't. The JBuds Wireless Mouse has a convenient rechargeable battery so you don't ever have to skip a beat. And it's better for the environment. No interruptions, less waste.
