

Camera 50 Blue

253941

The Camera 50 is designed for kids with a slim, easy-to-hold grip and a soft light bar for great selfies in low light. Kids can add doodles and stickers to their photos, and the AI will turn them into fun music vlogs.

PRODUCT DETAILS

Why Integrate AI in myFirst Camera 50?

Camera 50 makes video editing easy and fun for kids!

Our AI helps kids create amazing videos without the hassle. With simple tools and cool effects, they can add their own touch with stickers, drawings, and even their own voice!

Cultivating Young Storytellers with AI

Help kids become filmmakers and vloggers! The camera teaches them storytelling, boosts confidence, and lets them explore their creative side. It's a safe and fun way to learn about making videos without needing a phone.

Prioritizing Safety and Privacy

Not all AI cameras are the same, and the myFirst Camera 50 stands out. Unlike others, the Camera 50 helps kids create unique stories by analyzing their mood to make perfect videos, all while keeping privacy and security a top priority.

1. Privacy First: Camera 50 enhances photos and videos without tracking or collecting personal data. The AI is focused only on content enhancement.
2. Data Protection: No personal data storage or facial recognition. Your content stays secure and private, free from unauthorized access or data breaches.

Safety is a Priority

myFirst Camera 50 is designed with a safe and controlled environment for young creators, and the myFirst Circle app is the cornerstone of this safety.

Here's how Camera 50 and Circle app ensure safety:

1. Audible Shuttler: the camera's audible shutter lets you know when a photo is taken, safeguarding your privacy, guarantees no hidden photography.

2. **Limited Sharing:** Through myFirst Circle, parents can control who can see their child's creations, ensuring content stays within a trusted circle. Children can post photos in a child-friendly social circle, categorized by relationship type (Family, Besties, Friends, Acquaintances), with parents managing visibility and editing posts if necessary.

A Boost for Mental Wellbeing with myDiary

Journaling helps kids' mental health by providing a safe space to express emotions and reduce stress. It improves self-awareness and mental clarity, boosts creativity, enhances communication skills, and builds resilience by reflecting on experiences and solving problems.

Build Your Own Journal

Kids love tech, but it's important they use it for more than just fun. The myFirst Camera 50's "myDiary" feature is a great way for kids to express themselves and learn about their feelings. It lets them take photos, videos, and write about their adventures. This helps them:

1. Understand their emotions
2. Build confidence
3. Create lasting memories

Goes beyond a simple journal

1. **Safe & Secure:** Pin-code protection ensures your child's entries stay private.
2. **AI-powered growth:** The camera offers prompts and suggestions to encourage self-expression in a fun way.

Fun Colors and Accessories

Pick your favorite – vibrant purple or cool blue – then make it unique with fun stickers that reflect your style. For worry-free adventures, it includes a handy anti-drop hand strap and a comfortable neck lanyard.

Kid-Proof Protection

Give your child the freedom to explore without worry. This case features rounded edges, a thick TPU frame, shock absorption, and scratch resistance, making it the perfect shield for their device during all their adventures.

Advanced Shutter Control

Understanding the nuances of photography is crucial for young creators, and the myFirst Camera 50 introduces them to professional techniques with its advanced shutter control system. The camera features a dual-function shutter button that operates on a half-press and full-press mechanism, designed specifically to enhance the shooting experience and photo quality.

The Ultimate Selfie Machine

Capture flawless selfies with the Camera 50's built-in, adjustable Selfie Light Bar. This game-changer offers three warm lighting modes from cozy to neutral, all set to a gentle 4000K temperature, the Selfie Light Bar makes sure every selfie looks naturally awesome.

On-screen Button Tailored for Selfie Mode

Camera 50 is also designed with human natural movements in mind, the on-screen shutter button is easy to use in any hand position, making it simple to shoot the perfect selfie every time.
