

GoPro MISSION 1 PRO Creator Edition

257392

Put professional-grade wireless audio, I/O port expandability and all-day power in your hands with the MISSION 1 PRO Creator Edition. Designed for content creation, interviewing and live streaming, it includes the incredible MISSION 1 PRO camera, Volta 2 grip, Wireless Mic Complete Kit, Media Mod, Magnetic Latch Mount, Enduro 2 battery and a carrying case. Built around a 1" sensor for advanced low-light performance and powered by our next-generation GP3 processor, MISSION 1 PRO delivers pro-quality video up to 8K60 with enhanced image tuning to capture your cinematic vision without limits. In addition to legendary GoPro durability and award-winning HyperSmooth video stabilization, it lets you continuously record over 9 hours of 4K30 video. Loaded with pro features, it also captures 4K video at 8x slo-mo, 1080p video at 32x slo-mo and includes 8K Open Gate capture, HLG HDR, 240Mbps bit rate and 32-bit float audio.

PRODUCT DETAILS

Features + Benefits

1" Sensor + Advanced Low-Light Performance

The MISSION 1 PRO Creator Edition utilizes a 1" sensor (1.0-type sensor) that is larger than sensors found in most mobile phones and some compact cameras. The use of this larger sensor results in better low-light performance with less noise than the smaller sensors—making it ideal for capturing cinematic footage in all conditions including dusk, indoor and night shots.

Next-Generation GP3 Processor

With 2x the power of our previous GP2 chip, the revolutionary GP3 SoC (system on chip) delivers higher resolutions at extremely high frame rates for smoother motion and slow-motion playback. It also powers dual AI engines that run advanced denoising algorithms for amazing low-light capture.

Best-in-Class Video With 8K Open Gate

8K video delivers breathtaking image quality with 300% more resolution than 4K. The MISSION 1 PRO Creator Edition takes it even further with Open Gate capture that uses the full image sensor for maximum height and width for the most post-production flexibility.

Over 9 Hours of 4K Runtime¹ + Faster Charging

The MISSION 1 PRO Creator edition combines MISSION 1 PRO's new 2150mAh Enduro 2 battery with the power of the Volta 2 grip to give you all-day capture with over 9 hours of continuous 4K30 recording while improved heat management helps prevent thermal shutdown. It's also capable of rapid charging so there's less downtime and more production time.

Intelligent Image Tuning

The MISSION 1 PRO Creator Edition features new capture modes that can intelligently adjust for motion, lighting, environmental conditions and the presence of people in your shot.

- Sport POV optimizes HyperSmooth video stabilization and field of view for high-speed action footage.
- Dive mode adjusts video stabilization and color tuning to meet the challenges of underwater recording.
- Vlog mode prioritizes people over scenery by using face recognition to adjust exposure and tone mapping to produce flattering results.
- Subject Tracking keeps your subject framed in the shot whether you're capturing selfies or shooting follow-cam footage.

Our Slowest Slo-Mo Ever

The MISSION 1 PRO Creator Edition can capture 4K video at an incredible 240 frames per second that lets you slow down the action and catch every detail of your footage in 8x slow motion. Slow it down even more with 1080p footage at 480 fps for 16x slow-mo. Switch to Burst Slo-Mo for our slowest slo-mo ever and record 10-second 1080p video clips at 960 fps for 32x slo-mo.

Award-Winning HyperSmooth Video Stabilization

Emmy® Award-winning HyperSmooth video stabilization continues to set the bar—giving you cinema-smooth movement, no matter the terrain. New capture modes use intelligent image tuning to provide optimal video stabilization while AutoBoost dynamically ensures that you're getting the widest stabilized footage.

Built-in 360° Horizon Lock

The MISSION 1 PRO Creator Edition's Linear lens with Horizon Lock automatically gives your footage a steady, straight, smooth horizon, even if your camera rotates a full 360° during capture. Combined with HyperSmooth video stabilization, Horizon Lock delivers the super-smooth polished look of a high-end production.

1-Handed Control + Remote

Integrated camera buttons on the grip give you easy one-handed control of your camera: power on and off, start and stop capture, and switching modes. You can even detach the camera from the grip and use the grip as a wireless remote to control your camera from up to 98ft (30m) away.

Built-in Tripod

In addition to making it easy to hold and aim your camera, the MISSION 1 PRO Creator Edition's Volta 2 grip has built-in tripod legs that easily flip out any time you need to set it down to capture stationary and hands-free shots. Swivel mounting fingers even let you rotate and tilt the camera to find just the right capture angle.

HLG HDR Video

The MISSION 1 PRO Creator Edition lets you enhance its best-in-class image quality with Hybrid Log Gamma (HLG), a standard HDR format that captures video in the 10-bit and Rec. 2100 color space for playback with compatible displays and media players.

High Bit Rate

The MISSION 1 PRO Creator Edition gives you the option to capture video up to a high 240Mbps bit rate when your project demands the most detailed and precise imaging possible. You can also use standard

bit rate to minimize file sizes.

10-Bit Color + Log Encoding

Choose between standard video at 10-bit or Log encoding at 10-bit with GP-Log2. Capable of displaying over 1 billion colors, 10-bit color delivers enhanced color depth, smoother gradations and more realism in your videos. You also have the option of GP-Log2 to retain more details in highlights and shadows while making necessary image corrections in post-production (a lookup table/LUT is provided).

112°-156° Field of View

The MISSION 1 PRO Creator Edition expands your creative range with a field of view ranging from 112° to an expansive 156° to capture more of the scene in every shot and help immerse the audience in your story. Choose from the linear, wide or SuperView digital lenses for sweeping landscape shots, everyday scenes or POV action footage.

Timecode Sync

Creators with more than one compatible GoPro can sync them with the exact same timecode to make multi-camera editing a lot easier. It works with Final Cut Pro®, Adobe® Premiere® and other editing software to further streamline post-production.

50MP Photos + 44MP Frame Grabs

The MISSION 1 PRO Creator Edition takes up to 50MP photos in Single, Interval and Burst modes while giving you the option of letting it automatically adjust settings for night and low-light shots. You can also grab stunning photos up to 44MP from 4:3 8K videos using the GoPro Quik app.

4K Zoom

Zoom in to 2x to get the shot while maintaining the quality and precision of 4K video resolution. Or get even closer to the action without repositioning yourself or your gear with 4x digital zoom.

Night Effects

The MISSION 1 PRO Creator Edition features 3 Night Effects modes that let you get creative after dark. Star Trails uses the Earth's rotation and stars to capture beautiful light trails across the night sky. Light Painting lets you create brilliant brush stroke effects with moving light. Vehicle Light Trails uses night-time traffic to record stunning light trail shots.

Customizable Modes + Interface

The MISSION 1 PRO Creator Edition can be set up exactly how you want it. Add, re-order or hide mode settings to make using your camera as efficient as possible for your production needs. You can also create custom modes to instantly load up your favorite settings for a particular shot whenever you need them.

4-Microphone Array + Audio Tuning

The MISSION 1 PRO Creator Edition uses 4 microphones for improved stereo recording and wind noise reduction while Audio Tuning lets you adjust sound recording to better fit what you're capturing. Choose balanced, true-to-life sound that's great for most shots or the Voice setting that enhances vocal clarity while also preserving ambient background sounds.

32-Bit Float Audio

The MISSION 1 PRO Creator Edition lets you record 32-bit float audio to a separate .wav file for more post-production flexibility and extended dynamic range that virtually eliminates digital clipping. Whether you're in a quiet setting or crowded street, you'll get crisp, clear audio without distortion. You also have the option of recording the fully processed MP4 audio as a 24-bit .wav without lossy AAC compression.

Bluetooth® 5.3 Audio Connectivity

Bluetooth® audio lets you wirelessly connect your MISSION 1 PRO Creator Edition to wireless earbuds and microphones using the latest Hands-Free Profile (HFP) v1.9 with Super Wideband Speech (SWB)

standard. Use a wireless mic for enhanced audio when narrating a scene or conducting interviews. By connecting to your wireless earbuds, your GoPro will be able to hear your voice commands in noisy settings or when it's mounted out of earshot.

Multi-Track Recording + Manual Audio Controls

The MISSION 1 PRO Creator Edition's native multi-track recording capabilities seamlessly integrate the audio from all connected devices to streamline editing. With professional-grade audio controls such as Automatic Gain Control (AGC), manual Gain and Limiting, you can fine-tune recording levels to ensure clean, consistent audio in any environment.

ND Filter Compatible

Neutral Density (ND) Filters make it easy to add cinematic motion blur to your footage. Simply attach them to the standard lens and your MISSION 1 PRO Creator Edition will automatically adjust its settings accordingly. You can also use them to fine-tune your shot based on the lighting conditions.

Lens Hood Included

Simply attach the included lens hood to reduce glare and lens flares in environments with harsh light for clearer images with improved contrast and color.

Mounting Flexibility

Multiple 1/4-20 mounting points make it easy to use your MISSION 1 PRO Creator Edition with tripods, mounts and other camera accessories to create your own custom capture rigs.

GPS + Performance Stickers

GPS automatically captures telemetry data that tags your footage with its geolocation and other metadata. This allows you to add overlays as animated graphics on your video using the GoPro Quik app. It's a visually engaging way to show the speed, path, terrain, altitude and g-forces in your footage.

Highlight Videos Automatically Sent to Your Phone

Simply plug in your GoPro when connected to your home Wi-Fi. While it's charging, your footage is automatically uploaded to the cloud and used to make a highlight video complete with beat-synced music and effects. Videos are automatically sent to your phone and ready to share.

Edit With the GoPro Quik App

The GoPro Quik app is loaded with tools that let you edit the automatic highlight videos created by the app or make your own. You also have the flexibility to change digital lenses after recording, plus add filters, effects, transitions and more.

Faster Transferring +Unlimited Cloud Backup

The MISSION 1 PRO Creator Edition uses Wi-Fi 6 technology for faster, more reliable auto-uploading to the cloud with unlimited storage. Simply plug in your camera when connected to your home Wi-Fi and the camera does the rest. You can also transfer to your phone wirelessly or use a USB connection or transfer to a computer with your SD card.

Live Streaming

Use your MISSION 1 PRO Creator Edition to live stream your next activity as you vlog with buttery-smooth HyperSmooth video stabilization and sharp resolution. Live stream is supported in 1080p or 720p for platforms such as YouTube, Facebook or Twitch, and via RTMP using the GoPro Quik app.

Wireless Mic Complete Kit

MISSION 1 PRO Creator Edition includes 2 ultra-compact microphone transmitters that can be comfortably worn or hidden while clearly capturing every word of your interview or vlog narration. The included receivers (TRS and USB-C) connect to your DSLR, mirrorless camera or phone to deliver high-quality audio while letting you or your subject roam freely throughout your shot.

Media Mod Performance + Expandability

The MISSION 1 PRO Creator Edition Media Mod includes an integrated multi-pattern mic array that can be used to capture both mono and stereo audio with beamforming technology that lets you switch between polar patterns to choose the directionality and field of capture for more recording and vlogging versatility. Features a 3.5mm input for an external microphone, 3.5mm input for line-level signals and timecode input, 3.5mm output for headphone monitoring and 2 cold-shoe mounts for near limitless expansion. Also includes a micro HDMI output that supports 4K preview and playback.

Magnetic Latch Mount

The Magnetic Latch Mount makes it easier than ever to move your camera between your favorite mounting setups to quickly change your POV. It uses magnets to line up your camera, so all you do is snap it in place with the auto-engaging dual latches.

Built Around the Durable + Waterproof MISSION 1 PRO

At the core of the MISSION 1 PRO Creator Edition is MISSION 1 PRO. Used on its own MISSION 1 PRO gives you cinematic image quality, plus the legendary toughness through mud, snow and dusty backroads to underwater adventures all the way down to 20m with no protective housing needed.

Carrying Case

Comes in a convenient hardshell case.

Camera Capture Modes

- **Video:** Standard video mode that records footage in resolutions up to 8K.
- **Low Light:** Delivers high-quality footage in challenging lighting conditions while enhancing brightness and reducing noise.
- **Slo-Mo:** Captures 4K240 or Burst Slo-Mo at 1080p960 frames per second for 32x slowmotion playback.
- **Photo:** Features Single, Interval and Burst Photo modes that capture stunning photos up to 50MP.
- **Lapse:** Includes a Motion setting for stabilized time lapse footage when you're on the move, plus a Stationary setting for mounted shots.
- **Sport POV:** Optimized for action sports and dynamic movement with a wide field of view and stabilization tuned for high-energy motion.
- **Night Effects:** Star Trails, Light Painting and Vehicle Light Trails modes help you capture creative nighttime shots with no editing required.
- **Subject Tracking:** Automatically keeps your subject centered so you can focus on the moment rather than framing the shot.
- **Vlog:** Prioritizes people in your shot while adjusting exposure, tone mapping and color to ensure that subjects look natural and well lit.
- **Dive:** Features specially tuned video stabilization and settings to capture clear, colorful, stable footage below the surface.
- **Open Gate:** Records using the full sensor to capture the widest and tallest footage possible for maximum post-production flexibility and reframing.
- **Endurance:** Designed to maximize runtime for extended recording sessions and reduced thermal stress when recording in high-temperature environments.
- **Looping:** Continuously records video while overwriting old footage until you capture a key moment that you want to keep.

What's Included

- MISSION 1 PRO Camera
- Volta 2
- Wireless Mic Complete Kit
- Media Mod for MISSION 1 Series
- Magnetic Latch Mount
- Enduro 2 Battery
- Removeable Lens Hood
- Curved Adhesive Mount
- Mounting Buckle + Thumb Screw
- Metal Thumb Screw
- USB-C Cable

- Carrying Case
