PRODUCT DETAILS

MARSHALL SIGNATURE SOUND

With each new edition of Major we strive to fine-tune the Marshall signature sound you know and love. Custom-tuned dynamic drivers deliver thunderous bass and smooth mids. Brilliant treble gives you a rich, unrivalled audio that you'll never want to turn off. We also reduced distortion so that you can hear your music in absolute clarity. With Major V, the sound speaks for itself.

100+ HOURS OF WIRELESS PLAYTIME

Your next adventure awaits, and Major V is in for the ride. Packing 100+ hours of wireless playtime, you can be gone for days and never be left without a soundtrack. When you do run out of power, your journey won't be held up for long. Major V can be charged using the quick charge option, so you'll dive back into the session in no time. Whether you're listening to the latest releases, or the final track of a career-long back catalogue, Major V won't slow down until you do.

RUGGED AND FOLDABLE DESIGN

The first headphones we ever made; it doesn't get more classic than Major V. Their ruggedness means it'll take a lot to wear them down so you can listen to your favourite music for longer. While their foldable design makes them easy to pack away and carry with you wherever you go. Major V makes an entrance without taking up space. Every iteration keeps improving, but the design remains timeless.

CUSTOMISABLE M-BUTTON

Immediately access your favourite features with Major V's M-button. Instantly recognisable thanks to its iconic M script design, this button puts the power in your hands. You can use it to access the default Spotify Tap function and get straight to your music. If you want to reconfigure the M-button to another setting, just download the Marshall Bluetooth app. This will allow you to switch between the standard Marshall EQ preset, or a second preset of your choice. If you want to use the M-button to access your phone's voice assistant instead, consider it done.

WIRELESS CHARGING

We don't like wires either, they just get in the way. Thanks to wireless charging, it's simple to give Major V a boost when needed. Just rest your headphones on a charging pad and you're good to go. No more last minute scrambling in search of the right cable when you're in a rush. If you like keeping it old school, Major V can also be recharged using a USB-C charging cable included in the box.

BLUETOOTH LE AUDIO-READY

Never let anything get in the way of your music with Major V. It's Bluetooth LE Audio-ready to always ensure the best possible connection. This future-proof technology will deliver higher quality audio, while increasing the streaming range and improving audio sync, for an even better connection when watching video. Feel secure knowing that when this next-generation Bluetooth technology is activated, your headphones can more than handle it.

What's in the box

- Major V headphones
- 3.5 mm audio cord
- Quick start guide
- Legal and safety information
- USB-C charging cable
