JetBoots Prime

JetBoots Prime are fully wireless compression boots designed to reduce soreness, speed up recovery and boost performance. Their lightweight, foldable design allows you to take recovery with you wherever you go.

Wireless. Ultra-Portable Safe, Science-Backed Compression Levels.

Recharge your legs anytime, anywhere with the ultra-portable JetBoots Prime compression boots, which weigh only 6 lbs and fold up compactly to fit in a backpack. Featuring a fully wireless design with no wires or hoses, JetBoots Prime offer hassle-free recovery wherever you are. Utilizing TruGrade Technology™, these boots accelerate recovery, reduce muscle soreness, and improve performance by delivering precise, science-backed pressure levels sequentially up the leg. The advanced built-in pump system ensures consistent and balanced treatment, optimizing circulation and effectively removing metabolic waste more than competitors.

Science-Backed Benefits¹

- Speeds up recovery from post-workout soreness and fatigue
- Improves performance by increasing blood flow to the muscles
- Relieves muscle soreness and fatigue
- Improves mobility and flexibility

Pneumatic compression therapy

A new advanced, built-in pump system inflates and deflates both boots in cycles, filling four overlapping pressure chambers to increase circulation and deliver therapeutic benefits to both legs.

Ultra-portable and travel friendly

Designed to be travel friendly and lightweight without compromising performance. Fold them like pants, tuck them into the included drawstring backpack and take them with you for recovery anywhere.

Built-in customizable controls

Maximize your treatments by selecting from four pressure levels and a recovery time that's best for you.

Key Features

- Fully wireless and lightweight- no wires, no cables, no cords
- TruGrade Technology™ delivers safe precise pressure levels for optimal circulation
- Simple one-touch control panel and LED indicators built right into the boots for easy treatment customization.
- 4 adjustable pressure levels and 4 time settings for customized treatments
 - Pressure levels: 25, 50, 75, 100 mmHg
 - Time settings: 20 min, 40 min, 60 min, and continuous

- Made with easy-to-clean medical-grade materials to withstand heavy use and prevent bacteria build-up
- Up to 3 hours of recovery with ability to use while charging
- Available in 3 sizes: Short, Regular & Long
- Includes drawstring travel bag
- Lighter and more portable, only 6 lbs.

What's in the Box

- JetBoots Prime device (2 connected compression boots)
- Drawstring backpack
- USB-C charging cable (270 cm)
