Mill WiFi convection heater 1500W

252306

The Mill WiFi Max Heater, model CO1500MAXWIFI3, epitomizes both elegance and efficiency in home heating. Effortlessly control your home's temperature from anywhere via the Mill App, tailoring heat schedules to your daily routine, reducing electricity use, and cutting costs. Its advanced features include PID control for stable temperatures, predictive heating, easy WiFi connection, and enhanced safety with child and commercial locks.

PRODUCT DETAILS

The Mill WiFi Max heater is easy to control with the Mill App, no matter where you are in the world. In the app, you can conveniently program the temperature to automatically adjust to your daily routines. That way, you save the environment from unnecessary use of electricity, and you save yourself the unnecessary expense. In addition to being stunningly beautiful, this model has the same heating element you can find in all Mill panel heaters, which means it can safely operate without supervision.

PID control

When desired temperature is reached, the heater will maintain this temperature by lowering the power level, resulting in a more stable heating with less fluctuation in temperature.

Predictive heating

The panel heater will heat the room so that the desired temperature is reached at a specific time. The heater learns how fast the room goes up/down in temperature over time. That way, it will know when to start heating to achieve your desired temperature at the time you have scheduled in the Mill-app.

Easy connection

Seamless and easy connection with Bluetooth that automatically connects the device to your WiFi-network, regardless of the type of router you have.

Child safety lock

Activate the child lock in the Mill app to lock all buttons on the control panel of the heater. This prevents nosy little fingers from adjusting the temperature, or turn the heater on and off.

Commercial lock

Ensures that you as a landlord have control over the temperature and electricity consumption in the

rental properties in the Mill app.

Features

- Product size (W x D x H cm): 62,0 x 24,5 x 38,5 cm
- Weight (Kg): 5,5
- Model name: CO1500MAXWIFI3
- Aluminium heating element: high efficiency and low surface temperature
- Temperature calibration function
- Tip-over switch and overheat protection
- Power: 1500W
- Material front: Steel
- Material foot: Aluminium
- Cord: Black, 150 cm
- Placement cord outlet: End
- Grounded connection: Yes
- Open window function that switches off the heater automatically when a window is opened
- Possibility to let Mill Sense override the heater’s temperature sensor – allowing more precise temperature control
- OTA (Over the Air) updates allowing new exciting features to be added to the software
- IP classification: IPX4 (Approved for use in bathrooms zone 2)
- LOT20 Compatible – EU efficiency standard
