

BlendJet 2 Portable Blender - Black

250255

The BlendJet 2 portable blender with patented TurboJet technology makes blending easier and more convenient anywhere in the world. With a powerful motor and doubled battery capacity, it's five times more powerful than its predecessor. USB-C rechargeable, water-resistant, and self-cleaning, it's perfect for making smoothie-bar-quality beverages, protein shakes, and mixed drinks. Its compact design makes it ideal for adventures, and its quiet operation won't disturb others.

PRODUCT DETAILS

The Next-Gen Blender

BlendJet 2 serves up big blender power on the go. We created the BlendJet 2 portable blender so you can make anything you want, anywhere in the world — from a mountaintop to your kitchen countertop. It's easy and convenient to use at home, at work, outdoors, at the gym, in the car, at the beach, on vacation or wherever the day takes you.

Patented TurboJet Technology

Traditional blenders only use their blades to blend, but we invented a new method that makes every other blender obsolete. Our secret weapon? BlendJet 2's stainless steel blades are offset from the center of the base, which creates a tornado effect that blasts ingredients into the back of the jar 275 times per second, resulting in dramatically better blending. This technology — combined with a more powerful motor and doubled battery capacity — makes BlendJet 2 five times more powerful than BlendJet One.

Perfect for Everything

BlendJet 2 makes smoothie-bar-quality beverages, silky-smooth protein shakes, top-shelf mixed drinks and creamy frozen lattes, plus milkshakes, slushies, baby food, dips, dressings, sauces, and so much more. We'll send a new recipe video straight to your inbox each week to inspire creativity and ensure you get the most out of your BlendJet 2.

Shake Up Your Routine

BlendJet 2 is more than a blender — it's a way of life. It helps you live healthier while keeping your energy level sky-high. Make breakfast a breeze, reinvent lunch, fuel your workout or chill with a frozen

margarita, all while saving time and money.

USB-C Rechargeable

Get 15+ blends from just one hour of charging with any USB port. The BlendJet 2 portable blender is equipped with a water-resistant USB-C port that makes it easier than ever to power up. And the included cable is smartly reversible, so there's no wrong way to plug it in.

Self-Cleaning

Say goodbye to the most annoying part of blending. Bulky kitchen blenders feel impossible to clean — especially when you're in a hurry — but BlendJet 2 cleans itself. Just add a drop of soap, a bit of water, blend, and you're ready for your next blended creation.

Food Processing with Pulse Mode

With a double-press of the power button, your BlendJet 2 portable blender transforms into a powerful food processor that pulverizes veggies, fruits, nuts and more. You can pulse your way to tasty guacamole, pesto, salsa and hummus in mere seconds.

Forget the Measuring Cup

Measurement markings on the jar make it easy to follow our mouth-watering recipes or to create your own. With its 16 oz capacity, BlendJet 2 holds 33% more than the original BlendJet in a sleek and compact design.

Water-Resistant & Ready for Adventure

BlendJet 2 is also water-resistant, so you don't have to worry about getting liquid in the USB-C port or accidentally submerging your BlendJet 2 in the sink or pool. It's the ideal blender for mermaids.

Quiet Enough for a Library

We engineered BlendJet 2 to deliver incredible power without the jet-engine sound made by clunky kitchen blenders. In fact, the BlendJet 2 portable blender is so quiet, you can use it during late-night study sessions or early in the morning without waking up your household.

Lock Your Blender

Shift into Lock Mode to prevent accidental blending, and confidently toss your BlendJet 2 portable blender into your backpack or purse, or sip straight from the jar.

Specifications

- Compact Size: 230mm x 76mm
- Product Weight: 0.61 kg
- Jar with Measurement Markings: 475 mL
- 15+ Blends Per 1 Hour Charge
- Water-resistant USB-C Port
- 4000 mAh Rechargeable Battery
- 5V Electric Motor Spins 275 Times Per Second
