

GoPro Wireless Mic Complete Kit

256696

Upgrade your creative toolkit with this complete wireless mic system. This versatile kit includes two ultra-compact microphone transmitters that can be comfortably worn or hidden while clearly capturing every word of your interview or vlog narration. The included receivers (TRS and USB-C) connect to your DSLR, mirrorless camera or phone to deliver high-quality audio while letting you or your subject roam freely throughout your shot. It all comes in a convenient charging case that makes it easy to take anywhere while keeping the system powered up and ready to record.

PRODUCT DETAILS

Feature Bullets

- 1 Compatible with DSLR and mirrorless cameras, GoPro cameras with Media Mod and recording devices with a TRS 3.5mm audio port, plus mobile phones with a USB-C port
- 2 Wireless convenience lets you capture crisp, clear audio from up to 492ft (150m) away from your camera¹ with two transmitters for simultaneous audio capture
- 3 Captures high-quality 24-bit (wide dynamic range) audio at a 48kHz sample rate (high frequency response) when used with one of the included receivers
- 4 Transmitters connect directly to MISSION 1 Series cameras using Bluetooth® Super Wideband Speech for clearer, more natural sound compared to standard Bluetooth® connections
- 5 Ultra-compact mic transmitters weigh only 10g and can be easily clipped to clothing or magnetically attached using the included mounting magnets
- 6 Bluetooth® Audio lets you pair a mic transmitter directly to a GoPro HERO13 Black, HERO12 Black or MAX2 camera (without a receiver) to keep your camera compact and waterproof, plus pair directly to your phone²
- 7 Dynamic Noise Reduction (DNR) intelligently filters out background noise to deliver clear voice audio without the need for post-production adjustments
- 8 Gain control lets you fine-tune the audio level of your videos (-12 to +12dB range) to prevent high-end clipping or enhance softer sounds
- 9 Safety Track recording mode provides a backup audio option by recording a secondary audio channel at 6dB lower
- 10 Transmitters can run for up to 6.5 hours on a full charge while the TRS receiver can run up to 10 hours³
- 11 Included charging case has enough backup power to fully recharge each component twice
- 12 Headphone port on the TRS receiver lets you monitor audio levels during setup and recording
- 13 Included windscreen reduces unwanted wind noise when recording outdoors

Compatibility

- DSLR and mirrorless cameras and audio recording devices with a TRS 3.5mm audio port
- All mobile phones with a USB-C port
- Bluetooth® Super Wideband connection with MISSION 1 Series cameras
- GoPro cameras when used with Media Mod
