

GoPro MAX 360

255068

MAX never misses. It captures everything around you in stunning 5.6K spherical video while completely erasing your extension pole from the shot. Just point MAX anywhere and pick the best angles later. You'll be able to create immersive point-of-view footage, selfie shots, follow-cam footage and more from the same video.

The GoPro Quik app makes it easy to reframe and automatically track objects while powerful editing tools help you create videos that you can share straight from your phone. Intuitive camera controls let you tap and swipe to take ultra steady 360° TimeWarp shots and 360° photos or standard video in Single Lens mode with unbreakable Max HyperSmooth video stabilisation and Horizon Lock. Rugged, durable, waterproof and mountable, MAX is ready to capture your adventures from every angle and perspective.

PRODUCT DETAILS

Ultra Versatile 360° Video

By capturing 5.6K30 spherical video, MAX gives you the freedom to stay in the moment and still get amazing footage. There's no need to frame the shot. Just hit the shutter button to start recording. MAX captures everything. Get immersive POV footage of a mountain bike run and shots of you riding from the same video. Slow things down with 3K60 video to capture 2x slomo footage of your kids jumping in the pool and everyone's reaction at the poolside as they get hit with the splash. The GoPro Quik app makes it easy to reframe your footage from any perspective so that you can tell your story any way you like.

Easy 360° Editing With the GoPro Quik App

The GoPro Quik app is packed with features that transform your 360° footage into amazing shareable stories. Object Tracking locks onto your subject and automatically follows it no matter where it roams throughout your spherical footage. You can reframe your 360° footage into standard videos, grab photos and add dramatic transition effects to get exactly the shots you want before posting them right from the app.

Stealth Mounting

Capture amazing pole-mounted footage where the pole completely vanishes. Attach MAX to a grip or extension pole using the 1/4-20 mounting threads on the bottom of the camera. The pole will be automatically stitched out of your videos and photos. You can easily create incredible self-capture shots that look as if you're being recorded by another person and stunning drone-like videos that look like you're being recorded from the air.

Single Lens Video, Photo + Time Lapse

Single Lens (HERO) mode gives you the option to capture standard video, photos and time lapse footage just like our HERO cameras. Video can be captured in the 1080p video resolution for full widescreen playback on your phone or TV or in the 1440p resolution for taller, more immersive POV footage.

Max HyperSmooth Video Stabilisation

Max HyperSmooth video stabilisation helps you capture impossibly smooth single-lens footage no matter how much

your camera shakes, twists or turns while recording. Bike, skate, ski, chase your kids through the park or get amazing pet POV shots—all of your footage comes out silky smooth. Combine it with Horizon Lock for next-level performance that keeps the horizon perfectly straight.

360° TimeWarp

360° TimeWarp lets you speed up time by capturing shake-free stabilised time lapse footage while you're on the move. After recording, reframe your footage to capture it again from different angles and catch things you didn't see when you first recorded the footage.

In-Camera Stitching of 360° Video

In-camera stitching lets you easily offload your 360° content to the GoPro Quik app so you can see and edit your footage right away.

Premium 360° Audio

Six microphones capture immersive 360° sound to match MAX's immersive footage. Audio options include 360° audio that delivers true-to-life sound that precisely captures everything around you and advanced wind-noise reduction.

Includes an Enduro Battery

MAX comes with a high-performance 1,600-mAh Enduro Battery that helps boost cold-weather performance so you can power through epic ski and snowboard runs and capture majestic winter backcountry footage.

Rugged + Waterproof to 5 m¹

It's a GoPro—built tough. It's ready to capture your adventures through snow, mud and more. It's also waterproof to 5 m to protect against splashes and drops into the water.

Effortless PowerPano

Capture panoramic photos without the pan. MAX effortlessly snaps 270° distortion-free panoramic photos without having to scan the horizon.

Perfect for Vlogging

MAX's dual-lens design is perfect for vlogging. In Single Lens (HERO) mode, the screen can be front-facing so you can see and narrate the scene in front of you or rear-facing so you can perfectly frame yourself in the shot. You can also prioritise sound from either side of the camera no matter which lens you're using.

Digital Lenses

Choose from four digital lenses in Single Lens (HERO) mode to help you get the shot—whether it's immersive POV shots or stunning landscapes. Simply tap and swipe to switch between Narrow, Linear, Wide and ultrawide Max SuperView lenses.

Ready to Post

Single Lens (HERO) mode lets you capture videos and photos in both widescreen (landscape) or portrait orientation. Choose widescreen capture for full-screen playback on YouTube or on a TV. Record in portrait orientation for posting on social media.

Live Streaming in 1080p

Go live in Single Lens (HERO) mode and share while you're there. Live stream in 1080p on social media, get Max HyperSmooth stabilisation as you broadcast via the GoPro Quik app and save footage to your SD card to check out later.

Voice Control

Call your own shots with 12 voice commands, such as "GoPro, start recording" or "GoPro, take a photo". MAX understands English (US, UK, Australia and India), Chinese (Mandarin), French, German, Italian, Japanese, Korean, Portuguese (Brazil), Russian, Spanish (Europe and Latin America) and Swedish.

GPS + Performance Stickers²

GPS automatically captures telemetry data that can be overlaid as animated graphics in your video using the GoPro Quik app. It's a unique visual way to show off your speed, path, terrain, altitude and G-forces while giving your videos an intense professional vibe.

Fast Transferring + Unlimited Cloud Backup³

Transferring content from your camera to your phone is quick and easy. You can do it through Wi-Fi, choose a lightning-fast wired connection via USB3 or use your SD card to transfer your content to a computer. There's also unlimited cloud storage with hassle-free auto-upload. Just plug in your camera when connected to your home Wi-Fi and the camera does the rest.

Compatible With GoPro Mounts

Bike mounts, surfboard mounts, car mounts, pole mounts, grips, extension poles and more—GoPro has mounts that'll help you get any shot you can dream up. Capture your adventures from dramatic new angles and see them as you've never seen them before, or record point-of-view footage and relive amazing moments exactly as you saw them. MAX even has 1/4-20 mounting threads that make it compatible with tripods and other standard camera accessories.

What's included

- GoPro MAX Camera
- 2x Stickers
- Warranty
- Enduro Battery 1960mAh Li-on
- Curved Adhesive Mount
- 2x Rubber Lens Caps
- Microfiber Bag
- Mounting Buckle
