

Blueair Blue 3210 Air Purifier, Arctic Trail

249244

This high-performance air purifier cleans the air at the touch of a button in rooms up to 17 m².

PRODUCT DETAILS

The new Blue 3210 air purifier combines plug and play simplicity with signature Blueair performance, giving you clean air at the touch of a button. Simply push the one button control and Blue will automatically adjust to give you more clean air with less noise and less energy.

Filter

Comes with the Arctic Trail (dark grey) pre-filter to match elegant interior styles.

For the home

An air purifier that easily matches your personal style and helps create a comfortable environment in your home with a 360° air intake to completely clean the air in the room every 12 minutes. Blueair Blue 3210 is designed to help you breathe clean air in rooms up to 17 m².

Easy to use

Forget about adjusting settings and knobs - control it all from one-button. Press once for Auto Mode, twice for Night Mode, three times for Everyday Mode, and four times for Boost Mode. Equipped with smart sensor that automatically adjusts to real-time air quality conditions to ensure clean air at the touch of a button.

Automatic

With the Auto mode feature, Blue's smart sensor will monitor real-time air quality conditions and auto-adjust to optimize performance ensuring clean air in your home.

Autostart

The Autostart feature automatically restarts the air purifier at the last set speed after it's unplugged, used with a power switch timer, or if a power failure occurs.

Simple **placement**

With a large 360° intake, you can place the Blue air purifier anywhere in your room without compromising performance. Unlike some air purifiers which have limits on where you can use them, with Blue you have the freedom to place your air purifier wherever you want.

Intuitive indicator lights
With just a quick push of a button you can easily check how the Blue air purifier is running. Gently glows white to indicate selected fan speed and will change to red, letting you know when it is time to change the filter.

Whisper-silent
Many air purifiers cannot produce a high volume of clean air without making a lot of noise. The Blue 3210 uses HEPASilent filtration technology to deliver its powerful performance – quieter than a whisper (18 dB) on the lowest setting and normal conversation (48 dB) on the highest.

Filter life
We recommend replacing the main filter every 6-months when used 24 hours a day and cleaning the pre-filter fabric as needed to maintain optimal performance and ensure your warranty remains intact.
