Size	PRO SERIES, CLASSIC 400, CLASSIC 500/600, CLASSIC 200/300 , SENSE/SENSE+

Uncompromised particle removal

Particle filters minimize allergy triggers, viruses, and bacteria for a healthier home environment with high filtration efficiency. Together with HEPASilent™ filtration technology, Blueair's particle filters remove 99.97% of airborne particles down to 0.1 microns, including pollutants such as pollen, dust, pet dander, mold spores, viruses, bacteria, fine smoke particles and more.

Genuine performance, superior quality

Unlike generic look-a-likes, genuine Blueair replacement filters are specifically designed to maintain superior performance over time and ensures your warranty remains intact.

Replacement is easy

When it's time to replace your filter (about every six months), start by unplugging your air purifier. Open the back door to remove the old filter and vacuum away any dust on the inside. Insert the replacement filter, close the back door, and plug back in. Easy.

Specifications

- Filter Type: Filter with ultrasonically bonded polypropylene fibers free of chemicals and binders. Naturally anti-bacterial. Fiber shedding resistant.
- Dimensions (H x W x D): 454 x 365 x 45 mm
- Product weight: 0.6kg
