

Swiss B  b 

253989

The ultra-delicate baby hairdryer. A quiet running noise and a gentle, tepid airflow are ideal for the hair and body care of babies and all users with fine hair and sensitive scalp.

PRODUCT DETAILS

When it comes to baby care, safety and gentleness come first. A baby's hair is usually like soft down, and the scalp is very sensitive. A low noise level and gentle airflow are favorable. That's why Valera has developed a hairdryer dedicated to the little ones. The compact (12 cm long) and lightweight (310 g without cord) appliance sits comfortably in the hand and offers extra protection with the On/Off safety button: the hairdryer only runs when this button on the front of the handle is kept pressed. Swiss B  b : the super gentle hair and body dryer for babies.
