

Zense Coffee Maker Black

254708

Discover the Zense coffee brewer, designed for coffee lovers who want to enjoy truly great coffee every day. With its innovative design and advanced technology, Zense offers an exceptional brewing experience and taste every time. Simply delicious coffee!

PRODUCT DETAILS

Easy refilling with removable water tank
The removable water tank makes it easy to fill with fresh water directly into the tank. With a capacity of 1.25 litres and clear dosing recommendations, it's easy to achieve the perfect ratio of coffee to water.

Pump technology for fresh water
Our pump technology completely empties the water from the system after each brewing, ensuring that your coffee is always brewed with fresh, oxygen-rich water. This prevents old water from affecting the taste of the next brew.

Other coffee makers without pump technology can leave up to 1.5 dl of water in the system after brewing, which significantly impacts the coffee's flavour.

Better taste
The wide shower head is specially designed to evenly distribute water over the ground coffee, ensuring each cup is filled with rich and full flavour.

Perfect brewing temperature
Zense features an advanced brewing system that provides hot water for perfect extraction throughout the brewing process. It maintains an optimal brewing temperature of 92–96° from the first to the last drop, giving you the perfect cup of coffee every time.

Drip stop and adjustable Flow Control
The adjustable flow control allows you to customize the brewing process based on the amount of coffee you are brewing and also tailor the flavour outcome to your preferences. You can also pause the brewing with the drip stop.

Right coffee-to-water ratio
Use the measuring guide on the water container to get the ideal and recommended ratio of coffee to water for every brew.

Warming plate with automatic shut-off
Zense keeps your coffee warm after brewing with a warming plate that automatically turns off after 40 minutes.

Tip! We recommend brewing coffee multiple times instead of storing it for long periods – for the best possible taste.

Cleaning indicator for easy maintenance
When it's time for cleaning, the coffee maker will remind you by slowly pulsing the start/stop button, making it easy to keep your brewer in top condition.

Approved by the European Coffee Brewing Centre (ECBC)
Zense is approved by the ECBC, which sets standards for water temperature and contact time, among other things. To maximize the flavour from your coffee, it is absolutely necessary that the coffee maker operates at the correct water temperature. It is also important that the water does not take too short or too long to flow through the coffee. Small deviations here quickly result in either sour or bitter coffee.

Designed and developed in Norway
We understand Nordic homes and their desires and needs, and continuously work to deliver products that satisfy them.

Tips for better coffee:

- Rinse the coffee filter with water before brewing to remove any unwanted aftertaste.
- Always use fresh coffee. You get the best results if the coffee you use is freshly ground. Ground coffee quickly loses its aromas, and by grinding the coffee yourself just before brewing, you preserve all the coffee's aromas for the best possible coffee taste.
- If you want even hotter coffee, rinse the glass jug with hot water before brewing. This is especially recommended if you are brewing 0.5 liters of coffee or less.
- If the coffee maker has not been used for a while, we recommend running the coffee maker with clean water before use.
- Coffee residues always accumulate on parts that come into contact with coffee. For optimal coffee taste, you should regularly clean the filter holder, jug, and jug lid.
- Do not use the coffee jug to fill the water container as coffee residues affect the taste and quality of the brewed coffee.

Specs

Product Attributes

EAN:	7044876022813
Manufacturer number:	602281
Product weight:	2.69 kilograms

Technical specifications

Type:	Drip
Coffee type:	Ground beans
Brewing temperature:	92-96ºC
Keep warm function:	true
