

Wilfa Home Waffle maker, Black

251927

Wilfa's HOME waffle iron is guaranteed to give you golden, deliciously crispy and perfect waffles every time - with no spills or sogginess.

PRODUCT DETAILS

HOME WAFFLE IRON - WAYS TO THE HEART

There are few things that beat freshly baked waffles and with Wilfa HOME in your possession, the position of waffle master is assured. This is nothing less than an uncompromising waffle iron, where every little detail has been thought through - over and over again - to deliver heavenly waffle experiences.

Extra large waffles

The waffle iron has 6 extra large, deep and perfect hearts with a total circumference of 23 cm.

Heating element

Powerful 1400W heating element provides efficient and even frying.

Conical plates with double coating

Proprietary tapered plates give perfect results and ensure an even thickness over the entire surface of your waffle. The double non-stick coating gives the waffle iron a longer lifespan and allows the waffles to release easily from the iron.

Air gaps

The air gaps release the moist steam and ensure that the waffles are fried and not cooked. This gives you crispy and crusty waffles.

Supplied with scoop

No more sludge and mess - use the included scoop to pour the perfect amount of batter into the waffle iron. Close the lid and the batter will be evenly distributed using the conical frying plates that press the batter evenly over the entire plate. The result? A perfectly baked waffle - time after time.

Can be stored upright

To save valuable space in your kitchen cabinet, the waffle iron can also be stored on edge, taking up minimal cabinet space.

Uncompromising design

With a thermostat, efficient collecting edge, rubber feet, hand protection against steam and its own scoop for the perfect amount of batter, it goes without saying: this is a waffle iron far beyond the ordinary.

Highlights

- 1400 W
- 6 large hearts
- 23 cm diameter
- Adjustable thermostat
- Indicator light shows when the waffle is ready
- Double non-stick coating
- Can be stored upright
- Model name: WM-623B
