AlphaTheta WAVE-EIGHT DJ-Party Speaker

253336

The WAVE-EIGHT is a portable DJ speaker designed for partying and DJing anywhere. With features including SonicLink ultra-low-latency wireless technology, professional sound quality, effortless setup, built-in battery, and IPX4-rated waterproof design, it can be used anywhere.

PRODUCT DETAILS

SonicLink ultra-low-latency wireless technology

Finally, cable-free DJing is possible, with the WAVE-EIGHT, thanks to SonicLink. This new ultra-low-latency technology wirelessly transmits audio much faster than a Bluetooth connection so only a fraction of a second passes between pressing play on the decks and hearing the track through the speakers, meaning DJs can mix without missing a beat. And if the WAVE-EIGHT is combined with the new OMNIS-DUO portable all-in-one DJ system, which also features battery power, it's possible to DJ cable-free for total freedom.

Professional sound quality with effortless setup

With a highly efficient Class D amplifier, a newly developed 8-inch driver, and a Vortex Bass Accelerator which delivers clear and powerful bass, the WAVE-EIGHT brings the vibes and the punch to a party's sound, even in outdoor settings. To cover larger events and spaces, more units can easily be added to a setup via the SonicLink connection: e.g., using 2 speakers in stereo for an expansive experience, or with a third added as a dedicated subwoofer for a club-like heavy bass sound. There are even several modes, that are easily changed between with a single switch, to create the type of sound needed, including Mono, Stereo, and Subwoofer mode.

Battery power and waterproof design

A full battery charge gives 8 hours of music on the WAVE-EIGHT so the tunes will keep going throughout the evening and night. The unit is also waterproof, with an IPX4 rating, so it's ideal for using outdoors. And, if someone needs to charge a phone or another device, they can plug it into the USB Type-C port.

Easy portability

The extendable handle, casters, and additional grab handles make it easy for one person to carry the WAVE-EIGHT to any location. There's a pole socket built-in too, so the speaker can be mounted on a stand for extra height, making it ideal for use in a variety of locations.

Specifications

- Dimensions (W × H × D): 300 × 554 × 337 mm

- Weight: 12.7 kg
- Frequency range: 2.4 GHz (2.4000 GHz – 2.4835 GHz)
- EQ modes: Music / Music (Low Cut) / Flat / Flat (Low Cut) / Vocal / Subwoofer (Low Cut mode is intended for use on units that are combined with a WAVE-EIGHT set to Subwoofer mode.)
- Battery life / Battery spec: Approximately 8 hours
