Swiss X Pulsecare Straightener

254002

Digital straightener with Pulse Frequency System and ion generator for professional hair straightening and curling. With Swiss'X Pulsecare, also dyed hair can be styled to professional results, in the same time preserving its color radiance.

PRODUCT DETAILS

Enjoy straightening and curling your hair to awesome styles being assured to best protect its color! When it comes to dyed hair, frequent heat styling could compromise shine and brilliance of the dye. The Valera hair straightener has got three technical features to optimally protect the hair during the treatment, providing at the same time fantastic styling results. The high temperature precision, the delicate power of ions and the excellent quality of ceramic coating with tourmaline are the color protecting elements in the Swiss'X Pulsecare hair straightener. Hair color will shine with more intensity, luminosity, and healthy naturalness.

FEATURES

- Pulse Frequency System with 200 sensor controls per second for total temperature management
