Pioneer DJ DDJ-FLX-GT DJ Controller

252033

The Pioneer DJ DDJ-FLX6-GT is an updated 4-channel DJ controller that will replace the popular DDJ-FLX6. It features a fresh design for a new look and improved playability, and it's compatible with an expanded range of software. The new DJ controller adds support for VirtualDJ (license available separately), while retaining free compatibility with rekordbox and Serato DJ Pro. TRAKTOR PRO 3 will be available to use by downloading the mapping files (TSI file). The popular Merge FX feature is still there too, making it easy for DJs to transition between musical genres.

PRODUCT DETAILS

All-new Merge FX

Add drama to your sets and easily mix different styles of music. No matter what the BPM or key of the next track is, you can create an exciting transition whenever you want. Simply press the knob and turn it as fast or as slowly as you like to start building up the tension in the music.

1. Select a Merge FX preset and press the knob

Choose one of the 4 assigned Merge FX patterns and press the knob to start building the tension.

2. Turn the Merge FX knob

Increase the influence of the effect by simply turning the knob — depending on the preset pattern you've chosen, the combination of different effects and samples is triggered at the same time.

3. Press the knob again to release the effect, then play the next track

When you're ready to make a drop and move to your next track, simply press the knob again. The effect is released and, when one is assigned in the preset, the sample plays. The track stops automatically so all you need to do is hit play on the other deck to drop your next track.

4. Customize your Merge FX

In the new Merge FX section in rekordbox (PC/Mac), you can customize each effect type and the samples used in each pattern to create your own variations. Choose from 41 types of effect for each element (Build FX, Build Sample, Release FX, and Drop Sample) and combine them to create more than 9,000 different patterns.

Jog Cutter: Create pro-sounding scratch effects, one-handed

Turn on Jog Cutter and simply move the jog wheel to apply a professional-sounding scratch effect to the last Hot Cue or playback position you used on that deck. There are 10 different scratch patterns and you can switch from one to another by simply moving the playhead position, shown on the jog wheel's display, to point toward the angle for the scratch you want to use.

Full-size jog wheels with track position display

Pitch bending and scratching feels natural thanks to the large jog wheels, which are the same size as those on the flagship CDJ-3000 multi player. Each one features On Jog Display too, so you can keep an eye on the playhead position.

Sample Scratch: Get creative with your favorite sounds

Sample Scratch is a brand-new pad mode in rekordbox which enables you to choose sounds you've assigned to the sampler and load them onto the decks. So, when you want to create a live remix of a track, or simply add some texture to the music, you can scratch with your favorite sounds.

New aesthetic design

The layout of the controls on the DDJ-FLX6 is similar to that on our club-standard CDJ + DJM setup, so you can perform intuitively. However, this DJ controller introduces a fresh look, with a high-quality dark-gray matte finish and redesigned jog wheels that will make your setup stand out.

Other features

4-channel mixer: The mixer section has 4 channels, so you can freely create mashups or scratch on the fly.

USB powered: Simply connect the controller to your computer using the included USB cable.

Built-in sound card (audio interface): Thanks to a built-in sound card, the DJ controller connects straight to your speakers or amplifier via a single RCA cable. Plus you can record to rekordbox using the same USB connection.

Performance Pads: Hit the 8 back-lit rubber Performance Pads to trigger Hot Cues, Pad FX, Beat Jump, and the sampler.

Class compliant: Plug your DJ controller into your PC/Mac and start DJing – there's no need to install an audio driver.

Pitch 'n Time DJ: The Serato Pitch 'n Time DJ Expansion Pack is included.

FX Pack: The Serato FX Pack is included. Get creative with Single FX mode or Multi-FX mode for in-depth control.
