myFirst bone conductive wireless headphones Lite, pink

253227

Enhance your child's listening experience with myFirst Headphones BC Wireless Lite. Featuring innovative bone conduction technology, these headphones transmit sound through cheekbones, keeping ears open to ambient sounds. They're designed for comfort with soft rubber contact points, ideal for extended wear during travel. Enjoy 5 hours of music playtime, swift 1.5-hour charging, and a convenient USB Type-C connection. Lightweight at just 28g and a robust 15-meter range, they're the perfect travel companion for the young audiophile.

PRODUCT DETAILS

Experience open-ear listening

Unlike traditional headphones, BC Wireless lite uses bone conduction technology to transmit sound via the cheekbones. This technology leaves ears open to the surrounding sounds. Audio is set to an appropriate volume, ensuring safe levels of listening to the child.

Bone conduction technology

Bone conduction technology allows for music to be transmitted via the cheekbones. Kids can listen to music while remaining alert outside.

Comfort for kids

Soft rubber contact points on myFirst Headphones BC Wireless provides comfort, even on long usage periods. Perfect for long flights and rides!

Larger silicon pad

Soft rubber contact points on myFirst Headphones BC Wireless Lite provide comfort, even during long usage periods. Perfect for long flights and rides!

A perfect travel companion

Unlike wireless charging, this headphone comes with a USB Type-C (or USB-C) as it is a way convenient way to stay charged. Now you can move around freely for longer periods of time with a decent nose reduction.
