

AlphaTheta DDJ-FLX2 DJ-Controller

254507

The DDJ-FLX2 DJ controller offers seamless compatibility with popular DJ applications like rekordbox, djay, and Serato DJ Lite, as well as streaming services including Apple Music, making it easy to mix with access to millions of tracks. Equipped with Smart CFX and Smart Fader features, it enables effortless transitions and professional effects, ideal for both beginners and advanced users. Compact and lightweight, the DDJ-FLX2 is designed for portability and versatility, with Performance Pads and Pad FX for creative, professional-style DJing anywhere.

PRODUCT DETAILS

Compatible with multiple DJ applications and streaming services
The DDJ-FLX2 works with various DJ applications including rekordbox and djay – popular choices among both beginners and professionals. After installing your preferred app on your mobile device, you can connect to the controller and start DJing right away. If you want to challenge yourself to learn more advanced techniques, you can use DJ software on your PC/Mac, including Serato DJ Lite. Each DJ application is compatible with different streaming services, so you can choose one based on the music and DJ style you want to play. If you go for djay, you can access Apple Music, allowing you to choose from over 100 million tracks and incorporate your favorite music into your mixes.

Mix easily with Smart CFX and Smart Fader
It’s easy to replicate the seamless song mixing of professional DJs thanks to the Smart CFX*3 and Smart Fader*3 features on the DDJ-FLX2. Smart CFX enables you to recreate complex and dynamic effect techniques used by professionals with a simple turn of knob. You can use it for connecting tracks together and for making your performances more dynamic by adding emphasis to the music whenever you like. Smart Fader automatically optimizes control of the volume, BPM, and bass – which is all needed when transitioning between tracks – and all you have to do is slide the crossfader in one direction. With this feature, you can easily mix tracks from different genres, even if they have vastly different tempos (BPM).

Lightweight, compact body with user-friendly features
The DDJ-FLX2 is AlphaTheta’s lightest and most compact DJ controller, so, you can take it anywhere you want to play. It runs on USB bus power, so there’s no need for an external power supply when you connect it to a PC/Mac or a mobile device via USB Type-C. You can start DJing easily by playing music through the built-in speakers of your PC/Mac/mobile device, or, if you plug speakers into the audio output terminals of the DDJ-FLX2, you can throw a loud party with friends. And, if you want to level-up your skills, you can use headphones to cue up tracks and challenge yourself to learn various DJ

techniques.

Performance Pads for professional-style DJing
It’s easy to manipulate your music with the Performance Pads on the DDJ-FLX2. Pad Mode Select allows you to switch between various modes, including Hot Cue mode, where you can mark any point in a track – e.g., the intro or chorus – like a bookmark which allows you to instantly jump to that point. With Pad FX, you can apply a variety of effects simply by pressing the pads, adding your own touch to the music. And, using the sampler, you can add sound effects or try performance techniques like finger drumming.
