PRODUCT DETAILS

Brilliantly clean water beyond filtration

Traditional pitchers collect unwanted pollutants in filters where they can quickly multiply and reverse contaminate your water.

The LARQ Pitcher goes beyond filtration with a unique 2-step filtration and purification process for pure-tasting water sip after sip.

Pure-tasting water

Our innovative plant-based filter uses Nano Zero technology to effectively remove chemicals like chlorine and particulates to improve the taste of water.

Eliminate contaminants

The LARQ Pitcher PureVis eliminates a range of contaminants such as lead, mercury, PFAS / PFOS, pharmaceuticals, VOCs and prevents bio-contaminant growth*.

Nano Zero filter technology

Our innovative plant-based filters are independently tested to NSF/ANSI 42, 53 and 401 standards to be effective against a wide range of pollutants.

Advanced Filter

Recommended for 360 protection against harsh contaminants and improved taste.

- Chlorine
- Mercury
- Cadmium
- Copper
- VOCs
- Lead
- Particulates
- Benzene

- PFAS/PFOA
- Pharmaceuticals

Long-lasting filters

LARQ Filters last up to 50% longer than leading brands, filtering 60 gallons (227 liters) of water before the next replacement. One LARQ Filter replaces more than 450 standard single-use bottles. Better for the planet and your wallet.
