

Wilfa Prostick hand blender set, 1000 W

255479

Prostick is a high-performance immersion blender developed in close collaboration with the Norwegian National Culinary Teams. With its powerful motor and technical innovation, it combines Nordic design and durability to deliver perfect results, every time. Whether you're blending silky smooth soups, making sauces, fluffy cream, pesto, or purées, Prostick is your ultimate kitchen assistant. The robust construction and thoughtful design, makes the Prostick the natural choice for both everyday cooking and advanced culinary projects.

PRODUCT DETAILS

Powerful motor. Motor protection system. Preset speeds

The powerful 1000-watt DC motor delivers consistent performance with every use. The unique motor protection system prevents overload, ensuring long-lasting durability.

It has three preset speeds:

- 5000 RPM
- 10 000 RPM
- 15 000 RPM

RPM in the context of mixing means "revolutions per minute," that is, how many times the mixer's blades or whisks rotate around their own axis in one minute. This indicates how fast the mixer operates, and thus how powerful or gentle the mixing will be. The higher the RPM, the faster and more powerful the mixing.

A motor protection system prevents overload and extends the lifespan.

Smooth and splash-free blending

With an ergonomic grip and intuitively placed buttons, you get good workflow and precision—even when multitasking. The mixer sticks have an innovative protective edge that reduces splashing, protects surfaces, and ensures clean and tidy mixing.

Ergonomic design for full control

- **Large stick** – ideal for larger quantities such as soups, smoothies, and pancake batter.
- **Small stick** – perfect for small portions and precision in, for example, sauces and emulsions.

Both sticks are made from materials that do not scratch pots and bowls, ensuring efficient mixing without vacuum or suction against the bottom.

Smart accessories – increase versatility

Precision chopper (1 liter): Robust Tritan container with a blade positioned close to the bottom. Chops everything from nuts to herbs evenly and efficiently. The lid with anti-slip provides stability, and the filling hole makes it easy to add liquids during use.

Double whisk: Quickly and easily whips airy cream, stiff egg whites, and other light mixtures.

Two measuring cups (0.5 l & 1 l): Durable Tritan cups withstand temperatures up to 100°C. The lid functions as a non-slip base during mixing. Perfect for smoothies, sauces, or hot soup.

Easy cleaning

All removable parts are dishwasher safe, but hand washing is recommended to preserve the sharpness of the blades.

What's in the box

- Mixer
- 2x Sticks
- Precise chopper
- Dual whisp
- 2x Measurement jugs
- Manual
