

Volo Automatic Coffee Machine

254709

Volo Automatic is a slim and high-performing espresso machine that delivers the perfect cup of espresso every time. With hot temperature, smart features, and an included milk container, the Volo Automatic enhances your coffee experience. The Volo Automatic is designed for coffee lovers who want a high-quality, user-friendly, and versatile espresso machine at home. Enjoy perfect espresso, lungo, latte, or cappuccino every day, quickly and easily.

PRODUCT DETAILS

High temperature for optimal taste

The Volo Automatic ensures every cup of coffee is served at a high temperature of up to 85 degrees right at the coffee spouts, making it one of the hottest espressos on the market. This precise heat level helps extract the maximum flavour and aroma from your coffee beans, delivering a rich and satisfying experience in every sip.

Fresh water every time

With the 1.5-liter removable water tank, it's easy to fill up with fresh water, which is one of the most important ingredients for truly great coffee. The water tank is equipped with a convenient handle and lid for easy handling.

More coffee per shot

The Volo Automatic uses 8-12 grams of coffee beans per espresso shot depending on the coffee used, providing a richer and more intense flavour. With more coffee per shot, you get a stronger and more aromatic espresso.

Large coffee bean container

The 150-gram coffee bean container, with a silicone ring to reduce air contact, ensures that Volo Automatic always makes fresh coffee.

Create perfect cappuccino or latte

This is not just a machine for espresso lovers. It also offers the ability to make lungo, latte macchiato, and cappuccino. Whatever your preferred coffee drink, the Volo Automatic delivers the perfect cup of coffee every time. With a 2.4 dl large milk container, you can easily add milk to your coffee and create delicious cappuccinos or lattes. Perfect for impressing guests or enjoying a café experience at home.

2-cup function and double shot

With the Volo Automatic's convenient 2-cup function, you can brew two cups of coffee simultaneously or choose a double shot for a double espresso. Perfect when you have guests or just want to enjoy an extra cup in the morning. This function saves time and makes it possible to serve coffee quickly and smoothly.

Adjust coffee quantity and grind size

Easily adjust the amount of coffee on the different settings. You can also choose from 5 different grind settings, making it possible to customize the grind size to your desired taste and coffee drink. Whether you prefer a finer or coarser grind, you can easily set the machine to get the result you want. Customize each cup to your preferences and enjoy a perfectly brewed coffee drink, just the way you like it.

Easy to clean

Volo Automatic is designed for easy cleaning. The brewing unit can be easily removed and rinsed under water, making it easy to maintain the machine. A cleaning brush is also included to help keep all parts clean and fresh. Additionally, the machine indicates when the coffee grounds container and drip tray need to be emptied, and they are easy to remove and clean directly under the tap.

Descaling agent included

To ensure your espresso machine always performs at its best, a descaling agent is included. We also offer descaling and cleaning agents for purchase separately, this helps extend the life of your machine and keep your coffee tasting great.

What's in the box

- Coffee machine
- Thre pcakets of cleaning agents for descaling
