

Wilfa Uniform+ Coffee grinder, Black

251926

With 3 years in development, it's the grinder everyone's been waiting for! The Wilfa Uniform series coffee grinders feature 58mm stainless steel, stabilised flat burrs for a more precise grind and an even extraction. The Uniform+ model also comes with precise and smart scale for the optimal coffee grinding experience.

PRODUCT DETAILS

UNIFORM COFFEE GRINDER - SUIT YOUR PREFERENCE

Wilfa's new coffee grinder with new improved and upgraded digital precision scale. Wilfa has been working for years with the main focus on developing products that give you the optimal coffee taste and the key to good coffee lies in the grinding.

58 mm wide and flat stainless steel grinder

The grinding head provides a more consistent particle size for sweeter coffee and a richer taste experience. The grinder is made of stainless steel and manufactured in Italy.

41 adjustment steps with precise grinding

The coffee grinder's adjustment steps grind slowly and precisely for espresso, Aeropress, pour over, filter coffee, press pot and other brewing methods. The coffee is ground slowly to prevent the coffee from overheating and losing its aroma and flavour.

Auto-stop

Grinding is automatically stopped after the last bean has been ground.

Easy to clean

Antistatic stainless steel coffee container reduces coffee dust. A small brush is included for easy cleaning.

Solid construction

The coffee grinder is made of solid steel and aluminium.

Precise digital scale included

The lid of the coffee grinder is equipped with a digital kitchen scale, Uni, with 0.1 g accuracy. It is easily connected to your iPhone or Android mobile phone via Bluetooth.

Included app
Wilfa Black is an app that gives you an overview of how to grind the optimal amount and to what grind level, as well as the "pour over" program.

The scale communicates with iOS and Android devices via Bluetooth. The app helps you grind the beans according to the amount of water you want to use.

Approved by the European Coffee Brewing Centre (ECBC)
The Uniform coffee grinder is one of three coffee grinders in Europe approved by The European Coffee Brewing Centre. It is an independent testing organisation that tests and approves coffee equipment for both the private and professional markets. The ECBC tests coffee grinders for precision in grind, consistency of delivery, temperature and how much coffee residue is left.

Highlights

- 58 mm wide and flat grinder with stainless steel blades
- Includes precision scale with timer function
- Grinds from coarse to espresso
- Metal container minimises coffee dust
- Auto-stop sensor
- Solid construction
- Model name: WSFB-200B
