The original format instant film for your vintage camera. Each pack has a small battery to power the Polaroid 600 cameras from the '80s and beyond, but it works with our i-Type cameras too. A timeless formula to create captivating moments you can relive and retell forever.

Style	BLACK&WHITE, COLOR FILM COLOR FRAMES, COLOR FILM, COLOR FILM ROUND FRAME
Size	8X , 2X8, 3X8, 40X

PRODUCT DETAILS

Polaroid 600 Black&White Film

Just like the Polaroid cameras from the '80s and '90s, our 600 film is a favourite for many. 600 film is the most common film for vintage cameras because it contains a small battery in every pack. Got a new camera? Don't sweat it. 600 film works with our i-Type models too. You get 8 instant photos in every pack.

- 8 Instant Photos
- Format: 3.5" x 4.2" (88mm x 107 mm)
- Classic white frame
- ASA 640
- Photos develop in 5-10 mins
- Best stored refrigerated

Store chilled, shoot warm

Temperature affects how the film works. Keep it stored cold in the fridge, but never freeze it. Ideally you should let it adjust to room temperature before you use it. That's around 55–82°F (13–28°C). When it's cold out, keep your photos warm in a pocket close to your body while they develop. Or if it's a hot day, make sure they stay cool.

Shoot with the light

The more light in your shot, the better your photo will turn out. Instant film loves light, especially natural light. Use the flash for all your indoor photos. For best results we also recommend using the flash for outdoor shots, unless it's a bright sunny day.

Develop in the dark

All photos appear blank at first. They're most sensitive during this time, so don't bend or shake them. Shield them from the light, and place them face down as they develop. Keep B&W photos shielded from light for about 1 minute, and color film for about 6 minutes.

Care for your camera

Your camera has a set of rollers inside the film door. Each photo passes through these rollers as it's made, so it's important to make sure that they stay clean. If the rollers get visibly dirty then gently wipe

them down with a soft, damp cloth.

For use with:

- Polaroid i-Type
- Impossible i-Type
- Impossible Instant Lab
