

LARQ

LARQ Filter Straw

253128

A revolutionary portable water filtration system that combines a high-performance Nano Zero filter with a seamless, low-pressure drinking experience. The Nano Zero filter technology improves taste for a smooth finish and removes lead, chlorine, PFAS (PFOA/PFOS), and particulates that meet NSF/ANSI 42, 53 & 401 standards. The Filter Straw is compatible with LARQ Bottle Flip Top and LARQ Bottle Swig Top.

PRODUCT DETAILS

Filtration at your fingertips

Nano Zero filter technology removes lead chlorine, VOCs and PFAS.

Easy-to-drink low pressure flip-top straw, plus easy-carry carabiner.

1 Filter filters up to 40 gallons of water (equal to 300 single-use bottles!).

How to use

1. Remove filter from the filter pod and dispose of the outer packaging.
2. Rinse the filter under running water for 10 seconds (make sure it's soaked).
3. There will be 4 straws in the box, select one that is right for your bottle.
4. Wet the straw with water. Take the straw (the ridge of the straw should be facing down) and push it through the silicone stopper until it stops. As you push, hold on to the stopper to prevent it from coming out of the pod.
5. Push the straw into the cap base until it's secure. If you have the LARQ Bottle Swig Top, use the silicone adapter and attach it to the straw before securing it to the cap.
6. Install the filter (tip facing down), and screw the pod cap on securely.

- 7. Fill the bottle with cold or room temperature tap water and screw on the cap.
- 8. Enjoy brilliantly filtered water anytime, anywhere.
