

Blueair SmokeStop™ filter for the Classic 200/300 series

249260

Compatible with 203, 205, 270E, 270E Slim, 280i, 203 Slim

PRODUCT DETAILS

Thorough removal of gaseous pollutants

Designed to absorb today's common gaseous pollutants like Volatile Organic Compounds (VOCs), traffic exhaust, smog, odors, smoke and airborne chemicals through high amounts of activated carbon. Ideal for use in rooms where constant removal of such pollutants is required.

Genuine performance, superior quality

Unlike generic look-a-likes, genuine Blueair replacement filters are specifically designed to maintain superior performance over time and ensure your warranty remains intact.

Replacement is easy

When it's time to replace your filter (about every six months), start by unplugging your air purifier. Open the back door to remove the old filter and vacuum away any dust on the inside. Insert the replacement filter, close the back door, and plug back in. Easy.

Specifications
