Professional performance for medium rooms

Filters the air at the industry-recommended rate of 5x an hour (or about every 12 minutes) in a 36 m² room to effectively lower particle levels and maintain a comfortable environment in medium sized areas, such as a large offices, classrooms and reception areas. Pro M moves an impressive volume of air at 330 cubic feet per minute on the highest speed setting.

Designed for your workspace

The galvanized steel housing delivers maximum clean air delivery in a compact design, and the sleek white appearance is designed to blend in seamlessly in a professional environment.

The secret behind powerful filtration

Our unique combination of electrostatic and mechanical filtration that we call HEPASilent™ filtration technology sets us apart. The combination allows us to use filters that are less dense and require less air pressure than traditional HEPA filters without a loss in performance—resulting in quieter and more energy efficient air purifiers.

Low energy consumption

Limit energy costs and use 24 hours a day without concern (11-85 W).

Quiet achiever

Noise-levels are no louder than a whisper on low speed (32 dB) and equivalent to the noise level of a quiet office on high (55 dB).
