

Wilfa Dualfry Grill air fryer with dual heating elements, 10 L

255016

The Wilfa Dualfry Grill 10L is a powerful air fryer with extra-high temperature capabilities and dual heating elements for superior cooking results. With its practical window, you have full control over the cooking process without the need to remove the basket.

PRODUCT DETAILS

Versatile Cooking Options

From grilling and frying to baking and drying, the Dualfry Grill 10L makes it effortless to prepare a variety of dishes, including French fries, chicken, fish, prawns, vegetables, pizza, dried fruit, and cakes. Whether it's dinner, snacks, or dessert, this air fryer has you covered.

Excelled in product test

Dualfry Grill 10L Airfryer has received the rating 'Excellent' from L&B Home! This airfryer has impressed the test panel with its combination of capacity, functionality, and user-friendliness. Read more about the test [here](#).

Dual Heating Elements

Experience improved cooking results with the Dualfry Grill's double heating element, featuring both upper and lower elements for a perfectly crispy exterior and juicy interior.

Convenient Preset Programs

Choose from 8 preset programs to automatically set the recommended time and temperature for popular dishes, including French fries, chicken, steak, pizza, fish, prawns, keeping warm, and drying.

Memory Function

Tailor your cooking programs with the memory function, allowing manual adjustments to preset programs for personalized results. Save your customized program for future use, eliminating the need for constant adjustments.

Large Capacity

With a spacious 10-liter basket, this air fryer can accommodate large quantities of food, making it ideal for families or gatherings.

Grill Function

The Dualfry Grill 10L features a grill function with an extra-high temperature and a grooved roasting plate, ensuring perfect grilling results every time.

Viewing Window

Monitor the cooking process easily with the practical window, providing full visibility without having to remove the basket.

Drying Ingredients

With temperature settings ranging from 30°C to 230°C, the air fryer effectively dries ingredients. Use lower temperatures for making granola, dried meat, dried fruit, and more.

Included Accessories

The air fryer comes with three different accessories: a griddle with grooves, a tray, and a pizza tin, enhancing your cooking versatility.

Recipes

Explore a variety of tasty and healthy dishes with our curated collection of air fryer recipes, inspiring your culinary creativity.

Tips and Tricks

- Use the air fryer to reheat leftovers for a crispy texture.
- Enhance crispiness by brushing or spraying ingredients with oil during cooking.
- Adjust cooking time and temperature manually for optimal results based on ingredient quantity.
- Convert oven cooking times and temperatures to air fryer settings by lowering the temperature by 20 degrees and reducing the cooking time by 20-25%. Always monitor ingredients for the best outcome.
