

Powerfuel 1800 Blender

254711

The Powerfuel 1800 is a high-speed blender designed and developed to effortlessly blend large quantities of ingredients, both hard and soft. With its powerful motor, it can even heat the contents up to 100 degrees. This is achieved by combining a robust 1800-watt motor with six sharp blades and a large 1.8-litre Tritan jug.

PRODUCT DETAILS

3 pre-set programmes

The Powerfuel 1800 makes cooking simpler. Choose from three pre-set programmes:

- hot soup: Prepare delicious, hot soups directly in the blender in just a few minutes.
- smoothies: Create perfectly blended smoothies every time.
- auto clean: Clean your blender quickly with just the touch of a button.

Just press start, let the blender do the work, and serve once it stops.

Adjustable speed and pulse function

With adjustable speed settings and a handy pulse function, you have complete control over the blending process. Whether you're crushing ice or making a smooth purée, you can adjust the speed to achieve the desired result every time.

Experience the Power of the Powerfuel 1800

With the Powerfuel 1800, you can effortlessly create hot soups, drinks, and purees directly in the blender. Thanks to its high-speed 1800-watt motor that can run continuously for up to 10 minutes without overheating, six specially designed blades, and an impressive 27,000 revolutions per minute, you can heat contents up to a full 100 degrees Celsius. The sturdy Tritan plastic jug withstands high temperatures, making it easy to prepare hot meals quickly, right in the blender. With the Powerfuel 1800, the only limit is your imagination. Make cooking a breeze and let the Powerfuel 1800 become your new favourite in the kitchen!

Durable and lightweight jug

The jug holds 1.8 litres, making it easy to prepare large quantities of smoothies, hot chocolate, or soup. It is made from BPA-free Tritan plastic, ensuring it is lightweight, durable, and able to withstand heating up to 100 degrees Celsius. The lid features a handy opening for adding ingredients and liquids as you blend.

Specially designed blades for crushing ice

With six specially designed blades, the Powerfuel 1800 easily crushes ice cubes, so you can create perfectly chilled drinks and smoothies. To maintain the sharpness of the blades, we recommend hand-washing the jug or using the auto clean programme.

Food tamper

Use the included tamper to stir ingredients in the jug and push them down towards the blades to ensure everything is perfectly blended. This is particularly useful for larger chunks or thicker mixtures, such as smoothie bowls or nut butters. The tamper can be used while the blender is running, as it does not reach the blades.

Motor warranty

The Powerfuel 1800 blender comes with a 10-year warranty on the motor, giving you peace of mind that your blender is built to last.

Easy cleaning

Cleaning has never been easier. Rinse the jug immediately after use, fill it with warm water, add a few drops of washing-up liquid, and start the auto clean programme. Rinse thoroughly.

Compatible with 2GO bottle

This model is compatible with our Powerfuel XL 2GO bottle, perfect for those on the go who want to take their smoothie to work, school, or the gym. Attach the 2GO bottle directly to the blender and blend your smoothie right in it - quick, easy, and convenient.

Specs

Product Attributes

EAN:	7044876023254
Manufacturer number:	602325
Product weight:	5.3 kilograms

Technical specifications

Power:	1800
Material:	Jug: Tritan. Blades: Stainless steel. Body: plastic.
Machine washable:	No
Max speed:	27 000 RPM
Programs:	Hot soup Smoothies Auto clean Mechanical
Controls:	
Other features:	Heat resistant jug (up to 100°C)
Pulse function:	true
Speed settings:	5
Removable/attachable cable:	false
Max operational time:	10
