DÉTAILS DU PRODUIT

Professional Audio Level Microphones

eMeet M2 Max supports meetings with 1-15 attendees. It comes with 4 Ø10mm directional microphones, whose sampling rate could reach 48KHz, which is often used in movies, DVD and professional audios, meeting users' HD voice requests. Volume changes and voice could be recorded more finely, leading to a new level of voice pickup. M2 Max conference room omnidirectional microphone provides users stunning voice transmission to the utmost extent.

Daisy Chain & Loud Speaker for Wider Using Scope

Daisy chain two eMeet M2 Max to achieve a wider scope of voice pickup and transmission by using a special eMeet daisy chain cable. After daisy chain and with the help of another M2 Max, you could easily let up to 20 attendees or so in a meeting room to hear louder voices, bringing people great call experience. This speakerphone for conference calls is definitely a great choice for all meetings, small as well as large ones.

VoicelA & Rubber Insulator for Noise Cancellation

This speakerphone comes with a unique VoicelA noise reduction technology integrated with each of the 4 mics, which helps to reduce common office noise, such as mouse clicking, typing noise, paper noise and etc. This USB powered speakerphone also has a rubber vibration insulator to cut down vibrations. Both the speaker and the microphones have three levels of internal isolation to avoid noises such as collision sound, stopping any remaining vibration transmissions and enhance voice quality.

2 Bluetooth Devices at Once & Personalization

This Bluetooth speakerphone could support users to connect 2 Bluetooth phones at once or 1 Bluetooth PC/mobile phone and 1 dongle with M2 Max. Meanwhile, the proprietary software eMeet Link offers users better personalization in renaming BT, extending or shortening the time required to enter standby mode, update product firmware & software, turning on/off the DOA light and etc.

Multiple Connection Methods & High Compatibility

USB, Bluetooth, AUX, Dongle Connection are all available for connecting to eMeet M2 Max. When connected through USB, the conference speakerphone can be turned on automatically, offering users a

smooth using experience. It is also compatible with various platforms, including Zoom, Skype for Business, WebEx, Goto Meeting, Google Hangout, Facetime and more. No matter Win7/8/10 or Mac OS could be easily connected with this conference speaker and microphone.
