Robot écumeur de piscine sans fil Aiper Surfer S1

253120

Make pool maintenance more convenient than ever before with the Aiper Surfer S1. Engineered for efficiency, this solar-powered skimmer boasts advanced paddle wheel design, brushless motors, and ultrasonic edge detection for comprehensive surface-level cleaning. You can control and customize cleaning sessions with the intuitive Aiper app, ensuring every corner sparkles. Designed for all pool types, the Surfer S1 combines eco-friendly energy, sophisticated navigation, and superior debris collection for a pristine pool with minimal effort.

DÉTAILS DU PRODUIT

Efficient Cleaning

Aiper's paddle wheel design and energy-efficient brushless motors ensure that no dirt escapes from the S1 during cleaning. Unlike other products, the remote control mode via our app allows users to target specific pool areas for cleaning. Thanks to the path planning functions of the Aiper chip, the efficiency of the S1 is significantly better compared to other products, as more is cleaned in less time.

Solar Charging

for environmentally friendly, carefree and uncomplicated cleaning. Simply place the device in the pool and let the device take control of the pool.

Sophisticated Battery

Fully charged, the solar battery of the Aiper Surfer S1 provides up to ten hours of pool surface cleaning.

Ultrasonic Detection

With Aiper's own integrated navigation chip, the Surfer S1 optimises the cleaning path of the skimmer. This improves cleaning coverage and overall efficiency for a smoother cleaning experience. With the Surfer S1's ultrasonic detection device, the skimmer intelligently recognises, protects and cleans even the outermost edges of the pool.

App Support

Stay in control of how your pool gets cleaner with the Aiper app. You can set or schedule cleaning tasks, receive notifications or manually control the Aiper Surfer S1 and manually detect elusive dirt.

Improved Debris Collection

We've worked hard to address one of the biggest concerns of skimmer owners - cleaning. With the Aiper Surfer S1's debris collection system, your cleaning worries are a thing of the past. You can now safely remove the skimmer from the pool without having to worry about spillages or removing further debris.

Two Cleaning Modes

With the Aiper Surfer S1, cleaning is done the way you want it. In addition to automatic cleaning, you can control the device manually via the Aiper app so that you can target problem areas in the pool and detect dirt.

Ideal for Any Pool

Ideal for any pool size. The Aiper Surfer S1 is ideal for standard, saltwater and natural pools.
