

GoPro Max Lens Mod 2.0 pour HERO12

252755

Obtenez un POV parfait avec la HERO12 Black en élargissant considérablement le FOV en écran large et en capture verticale, ainsi qu'une stabilisation vidéo Max HyperSmooth incassable jusqu'à la résolution 4K60.

DÉTAILS DU PRODUIT

Max Lens Mod 2.0 transforms your HERO12 Black into the ultimate POV camera, delivering super-immersive footage for any adventure. Capture more of the scene in every shot from an expansive FOV that's 36% wider than widescreen capture on HERO12 Black alone. Vertical Capture with Max Lens Mod expands your field of view by up to 48% without needing to rotate the camera or adding any additional mounts. Max HyperSmooth delivers unbreakable stabilization up to 4K60, and powerful Horizon Lock keeps footage level and steady even if you rotate a full 360°. Max Lens Mod 2.0 provides the widest field of view and highest level of video stabilization in a HERO camera, all in stunning 4K60 resolution.

- The must-have upgrade for HERO12 Black that transforms it into the ultimate POV camera, with super-immersive footage for any adventure
 - Ultra wide-angle digital lens options up to a 177° field of view at stunning 4K60 for the widest shots available in a HERO camera
 - Max HyperSmooth delivers unbreakable video stabilization in all video modes
 - Vertical Capture with Max Lens Mod expands your FOV up to 48% without needing to rotate the camera or adding any additional mounts
 - Horizon Lock, available for all digital lenses, keeps your footage steady even if your camera rotates a full 360° during capture
 - Max TimeWarp features our smoothest TimeWarp in stunning 4K with Horizon Lock
 - Smaller and lighter design than the previous Max Lens Mod, with a 2x more scratch-resistant lens
 - Up to 4x slo-mo with jaw-dropping 1080p120 footage, catching epic details you'd never be able to see with the naked eye
 - Easy, tool-free installation and removal
 - Hydrophobic lens repels water
 - Waterproof to 16ft (5m) when installed on your GoPro3
