### DÉTAILS DU PRODUIT

#### Hybrid Dual Drivers

The Epic Lab Edition boasts hybrid dual drivers – a dynamic driver for rich bass and low frequencies, and a Knowles® balanced armature driver for exquisite high frequencies. This fusion of drivers results in unparalleled, well-balanced, and crystal-clear sound quality. Here's how Knowles created a balanced armature driver tuned for higher frequencies.

#### Hi-Res Audio

Immerse yourself in the richness of Hi-Res Audio, delivered through LDAC (for Android). On iOS, you'll experience AAC, an advanced audio compression codec, ensuring that every note and detail of your music is reproduced with stunning clarity.

#### Hybrid ANC

Smart Active Noise Cancellation adjusts to the environment and continually learns how to best cancel noises, offering the best audio experience. Control how you hear outside noise with three noise control modes: ANC On, ANC Off, and Be Aware (pass through outside noises).

#### JLab App

With the new JLab App, you'll have control to customize the Be Aware setting to let outside noise in, touch controls, and sound to your personal preference – or use the presets for JLab Signature, Balance, or Bass Boost. The safe hearing option allows you to protect your ears from hearing damage with volume limits. Plus, get software updates for your product right when they're available. Available on the App or Google Play Store.

#### Sweatproof Sport Fit

Built to endure rigorous workouts, the IP66 rating protects against sweat and dirt, making these earbuds perfect for the gym, trails, and beyond. The ergonomic earhook is designed to fit even the smallest ears, staying securely and comfortably in place throughout your workout. Plus, with a built-in interval timer, you can easily program custom routines and stay focused on your training.

### **Serious Playtime**

Epic Sport ANC 3 features 12+ hours of wireless playtime in each earbud and 56+ additional hours from the charging case. That's 68+ total hours of Bluetooth playtime!

### **Connect to Multiple Devices**

With Bluetooth Multipoint, you enjoy the versatility of transitioning seamlessly from device to device. Hop from a podcast on your computer to a call on your mobile. You can connect simultaneously to two devices – mobile, laptop, and/or computer.

### **Clear Calls**

Whether you're in a busy office or a noisy city street, the Flex Open Earbuds' noise-canceling mic ensures crystal-clear calls. The MEMS mic in each bud helps eliminate background noise, ensuring that your voice is heard loud and clear on the other end.

### **Lab Spatial Audio**

Featuring spatial audio EQ straight from the Lab, enjoy another dimension and immersive sound. JLab's spatial audio algorithm makes you feel like you're sitting in the middle of a concert or standing in the middle of a fight scene.

### **Google Fast Pair**

Enjoy even more effortless pairing with an Android device with Google Fast Pair. When you take out your earbuds and have a supported Android device, you'll see a pop-up enabling you to connect via Bluetooth. Don't worry if you're not an Android user, JLab earbuds will connect with any Bluetooth-enabled device like iPhone with just a couple of taps.

### **Dual Charging**

After you run through the impressive up to 56+ hours of playtime, the Epic Lab Edition offers dual charging options, enabling you to power up wirelessly or through a USB-C cable, providing versatility and convenience.
