DÉTAILS DU PRODUIT

IrriSense 2: The 3-in-1 Smart Irrigation System

IrriSense 2 replaces the traditional controller, sprinkler valve, and electrical valve, making lawn irrigation smarter, simpler, and more efficient.

Up to 40% Water Conservation (Without Compromising Lawn Health)

Save up to 40% water without sacrificing lawn health. IrriSense integrates precise mapping, smart weather scheduling, TÜV-certified pressure stabilization, and EvenRain™ technology to deliver efficient irrigation that adapts to any condition.

Plant-Specific Multi-Zone Irrigation

One device supports up to ten unique irrigation maps and schedules. IrriSense enables independent watering for lawns, flowerbeds, shrubs, and trees, ensuring every plant type receives precise, customized care.

EvenRain™ Technology Covering 445

Cover up to 4,800 sq. ft (445m²) with Aiper's EvenRain™, simulating natural rain for even watering. Adaptive Re-Spray ensures no blind spots, while gentle streams protect soil and new seeds.

15-Minute DIY Installation

Set up in just 15 minutes—no professionals or pre-planning needed. Simply install, connect, and start watering. Lightweight (10.58 lbs) and portable, it won't damage your lawn or require complex installation.

Weather-Sense Response System

IrriSense syncs with weather forecasts to prevent overwatering. In Wi-Fi mode, it auto-pauses watering on rainy days. A built-in rain sensor stops irrigation after unexpected rain, optimizing water use for a healthier lawn.

Wi-Fi Remote Controlled Watering

Connect IrriSense to Wi-Fi for full remote control. It automatically adjusts for rain forecasts, ensuring efficient watering. Travel worry-free while maintaining a healthy lawn—no manual intervention needed.

Real-Time Status & Irrigation History

Monitor watering in real time with visual tracking, time remaining, and percentage completion. Access historical data on depth, duration, and coverage while tracking total water usage, savings, and efficiency.

Smart Timer Watering Schedule

Control watering schedules, frequency, and depth via the app. Calculates and distribute the perfect amount of water. Users can also set individual watering depths for precise, automated irrigation and a healthier lawn.

Smart Mapping & Zone Control

Easily map and manage multiple watering zones through the IrriSense App. Create, edit, and visualize each area for precise, plant-specific irrigation. Enjoy intuitive zone control with personalized watering precision.

Engineered Resilience Framework

Built to withstand extreme heat and harsh sunlight, IrriSense ensures reliable performance in any climate. Rigorously tested for durability, it delivers long-lasting operation, keeping your lawn healthy year-round.

Package Contents

- Smart Irrigation * 1
- Locator * 1
- Garden Peg * 4
- Allen Key * 1
- 10m (32.8 ft) Extension Cord * 1
- Power Supply * 1
- Check Valve * 1
- GHT Threaded Male Quick Connector * 1
- Quick Start Guide * 1
- User Manual * 1

*GHT: Garden Hose Thread (American Standard)
