

NARWAL

Narwal Flow 2 Intelligent Robot Vacuum and Mop

257472

Experience unparalleled home cleaning with AI-driven navigation and a self-maintaining station for a truly hands-free experience.

Features:

- AI-driven VLM spatial obstacle recognition
- High-heat 140 degree mop sterilization
- Powerful 30000 Pa suction performance
- Low-profile turret-less aesthetic design
- Up to 120 days of autonomous dust storage

The Narwal Flow 2 is more than just a vacuum; it is the heart of a modern, intelligent home. By combining cutting-edge AI with a truly autonomous station, it offers a level of convenience that allows you to reclaim your time. It is the ideal choice for anyone looking to integrate premium technology into their lifestyle.

Coloris

DÉTAILS DU PRODUIT

Unmatched Cleaning Power

Achieve a deeper clean with industry-leading 31,000 Pa suction power. This immense force ensures that even the most stubborn embedded debris is lifted from your carpets and hard floors with ease, leaving your home spotless.

Advanced FlowWash Technology

Experience superior hygiene with the rolling track mop system. By utilizing real-time 60-degree Celsius hot water rinsing, the mop stays refreshed throughout your cleaning cycle, effectively removing grime rather than just spreading it around your living space.

Intelligent AI Navigation

Navigate complex environments effortlessly with the NarMind Pro autonomous system. Featuring dual 1080p cameras and a Visual Language Model, the robot identifies and avoids specific household items like keys or toys while ensuring complete coverage of every room.

Seamless Carpet Deep Cleaning

Maintain pristine carpets with CarpetFocus technology. A retractable pressure plate creates an airtight seal that generates 4.2 times higher suction, pulling dust and allergens from deep within carpet fibers.

for a thorough, professional-grade clean every time.

Low Maintenance Base Station

Enjoy true set-and-forget convenience with the all-in-one base station. It automatically empties the dustbin, washes the mop pads with up to 100-degree Celsius sterilization, and dries them to prevent odors, significantly reducing your manual cleaning responsibilities.

Versatile EdgeReach Cleaning

Reach every corner and crevice with the extendable mop design. EdgeReach technology allows the robot to extend its cleaning reach, ensuring that dust and spills along walls and furniture legs are captured effectively for a comprehensive home refresh.

What's in the box?

- 1x Narwal Flow 2 Robot Vacuum and Mop
- 1x Self-Cleaning Base Station
