DÉTAILS DU PRODUIT

PROACTIVE HEALTH TRACKING
ScanWatch is the first ever hybrid smartwatch which can notify users that they are at risk for highly prevalent yet underdiagnosed conditions including breathing disturbances and atrial fibrillation. ScanWatch combines two medical-grade technologies: an electrocardiogram and an oximeter to provide on-demand essential vital parameters.

24/7 HEART SCANNING
Check heart beat and receive notifications when heart rate is atypical (low or high) and if irregular rhythms are detected.

ON DEMAND ELECTROCARDIOGRAM
Record a medical-grade ECG and detect atrial fibrillation or normal heart rhythm, monitor low and high heart rate in just 30 seconds.

BREATHING DISTURBANCES DETECTION
Monitor oxygen saturation all night long via embedded SpO2 sensors and see if any breathing disturbances occurred while sleeping, which can be associated with apneic episodes.

OXIMETER ON YOUR WRIST
Provides on demand medical-grade oxygen saturation level (SpO2) in just 30 seconds.

BEYOND BASIC ACTIVITY TRACKING
Improve cardiovascular fitness with the help of dedicated workout metrics, Fitness Score via VOmax, connected GPS and an altimeter for floors climbed. Choose from 30 activities and launch workout mode directly from your wrist.

ADVANCED SLEEP ANALYSIS
Delivers a Sleep Score based on light and deep sleep cycles, sleep duration & wake-ups. Set a silent vibrating alarm and take advantage of Smart Wake-Up to wake at the optimal point in your sleep cycle.

DURABLE DESIGN. UNSURPASSED BATTERY LIFE.
ScanWatch features a combined heart rate and SpO2 sensor, 3 electrodes, an altimeter and PMOLED screen—all within a stainless steel case protected by sapphire glass, and features a rechargeable battery that lasts up to 30 days.

WATER RESISTANT TO 50M
ScanWatch is water-resistant up to 50m (5ATM) and provides advanced swim analysis: number of laps, strokes, type of stroke, and distance while swimming.

ESSENTIAL INFO AT A GLANCE
Use the digital crown of the watch to easily retrieve data on the PMOLED screen and directly launch features from your wrist such as ECG or workout mode. Stay in-the-know on the go with smartphone notifications.

MEDICAL DATA IN HAND
ScanWatch seamlessly syncs with the free Health Mate app via Bluetooth and provides valuable data that can be used daily or during a doctor's visit. Works with Apple Heath, Google Fit, Strava and 100+ top health & fitness apps.

What's in the box

- Scanwatch Hybrid Smartwatch with a dedicated wristband
- Magnetic charging cable
- Quick start guide (English, French, German, Italian, Spanish)
- Reusable transport pouch
