

Silk´n SilkyAir Pro

256769

Achieve salon results at home with SilkyAir Pro. Experience ultra-fast drying, 6 temperature settings, and advanced Water Ion technology for ultimate shine and volume.

DETTAGLI DI PRODOTTO

Get ultra-fast results with a powerful brushless motor reaching up to 110,000 rpm. Dry and style your hair in an instant with low temperatures and experience the multiple benefits of our Premium Water Ion technology that ensures less frizz and smoother hair. With its dynamic high-end LED display, you can easily choose the setting you prefer.

Why the SilkyAir Pro Changes Everything:

- Powerful Concentrated Airflow: The high-end brushless motor generates an airflow speed of up to 76 km/h, drying and styling your hair quicker than ever while adding gorgeous volume.
- No Heat Damage: This hair dryer measures the air temperature 50 times every second, automatically adjusting it to prevent heat damage and preserve natural hair quality.
- Premium Water Ion Technology: Draws moisture from the air and converts it into charged micro-water particles that penetrate deep into the hair cuticles, reducing split ends, preventing frizz, and boosting shine.
- Ultimate Styling Versatility: Features 6 distinct temperature settings (39°C to 98°C), 3 speed levels, and a dedicated cool shot function to lock your style into place.
- Premium Accessories Included: Comes complete with 2 custom magnetic attachments, a silky travel pouch, and a heat-resistant mat for safe styling.

Advanced Magnetic Attachments:

- Concentrator Attachment: Engineered for a faster, more focused airflow ideal for effortless blow-drying and high-precision styling.
- Diffuser Attachment: Spreads the air evenly over a wider area with longer prongs to reach deeper into the hair, perfectly defining natural curls and waves.

Smart Features & Premium Ergonomics:
The dynamic LED display clearly highlights your active settings, including temperature, speed, and a handy lock function. On top of its performance, the SilkyAir Pro features an ultra-lightweight design, an extra-long 3-meter cable for freedom of movement, a whisper-quiet motor operating at just 75.7 dB, and an internal self-cleaning function for long-lasting durability.
