PRODUCT DETAILS

Ultimate Creative Master

- Advanced AI Tracker
- Detachable Touchscreen Remote
- Built-in Extension Pole
- Upgraded 500g Payload
- RGB and CCT Fill Light
- iSteady 9.0 Stabilization

Advanced AI Tracker

Track Any Subject with Native Cam Enhanced AI tracking capabilities go beyond just people—you can track pets, buildings, cars, and more. Compatible with phone native camera and all your live streaming and video apps.

100% Boost in Pixels - Never Lose Track Increased pixel counts and powerful processor to provide precise identification and seamless tracking of targets, even if the subject is blocked or moves out of the frame.

Portrait Composition - Highlight What Matters Simple gesture control to set your preferred position to be tracked, highlighting what matters most in your video and enhancing creativity for your audience.

Quick Composition During AI tracking, a single press of the trigger or side button will pause or resume AI tracking. This allows you to quickly adjust the subject's position in the frame.

Smooth and Efficient - AI-Powered Gimbal Move With AI-power tracking, you can focus less on pacing and steps, effortlessly produce stunning tracking shots and arc shots with fewer retakes.

Convenient and Secure - Safety Locks Design The safety locks keep the AI tracker securely attached to the phone clamp, so you won't have to worry about it falling during shoot.

Patented and Certified - Pioneer of AI Tracking Gimbal Since launching the world's first gimbal with an on-device AI tracker in 2021, we stay at the forefront and earn the recognition as the "Pioneer of AI Tracking Gimbal."

Control at Your Fingertips - Detachable Touchscreen Remote

Simple Target Selection Double Tap, and Track Easily double tap or drag-select the tracking target on the touchscreen to quickly capture any subject, centered or positioned just where you want.

Real-Time Preview Real-time AI tracking footage is displayed right in front of you, ensuring precise composition at all times, especially during rear camera shooting.

Quick Setting of Parameters The touchscreen features an intuitive UI, allowing quick setting of both gimbal and shooting parameters, simple and user-friendly.

AI Tracking Calibration Long press the side button to enter AI tracking calibration, which ensures the preview frame of the AI tracker aligns perfectly with the camera regardless of its position on the phone.

Detachable & Removable - 10 Meters, Instant Control Unlock versatile control at your fingertips with the control range up to 10 meters, and experience effortless solo filmmaking without an extra set of hands. *Data obtained from testing remote control in an open, unobstructed, and interference-free environment.

High and Low-Angle Shots - Built-in Extension Pole

193mm Extension Pole - Extend Your Creativity The sturdy extension pole provides stable support for creative shots from different angles, effortlessly capturing aerial shots and pet's eye views.

360° Infinite Pan Rotation - Unrestricted Gimbal Move

With a professional orthogonal 3-axis design, it offers 360° infinite pan rotation and a 325° wide tilt range, giving you total freedom in camera movements.

Instant Ultra-Wide-Angle Mode - Breathtaking Visual Impact

A quick four-press of the trigger button switches to ultra-wide-angle mode, providing a wide and unobstructed view with the phone screen facing the roll motor.

Unbeatable Compatibility - Upgraded 500g Payload

1/4"-20 Screw Hole - Multiple Expansion Options

With three expansion ports, you can attach professional accessories like phone lenses, microphones, and fill lights, bringing new possibilities.

- Phone Lens
- Microphone
- Fill Light

Compatible with 95% of Smartphones - Support Foldable Phones

Optimized phone clamp fitting widths of 58mm to 90mm, and enhanced motors to provide stable support for large and even foldable phones (folded thickness of 12.5mm).

*Compatible with foldable phones such as VIVO X FOLD 3, Huawei MATE X5, OPPO FIND N3, Xiaomi MIX FOLD 4, etc. *For more information please contact us or refer to the Smartphone Compatibility List.

Native HarmonyOS App

- iOS
- Android
- HarmonyOS

Compatible with iOS and Android, the Hohem Joy app is also one of the first native apps on HarmonyOS, offering access across the top three operating systems.

360 Lighting Colours - RGB and CCT Fill Light

RGB Fill Light - 360 lighting colors

CCT Fill Light - Warm, neutral and cool light from 2700K to 6500K

Integrated RGB and CCT fill light flexibly illuminates your front and rear shots, and supports seamless

control of brightness and color temperature from remote.

Robust Algorithm - iSteady 9.0 Stabilization

Set a New Bar for Stability Delivers unmatched anti-shake performance, effortlessly adapting to walking, running, and even high-speed motion scenes.

Hassle-Free Storage - Axis Locks on Each Arm With axis locks, you can secure all three motors in seconds to reduce shake for easy, hassle-free storage after filming.

Master of Control - Operations of Pure Enjoyment

Side Roller Delivers precise control for motor rotation, focus adjustment, and CCT & RGB fill light.

A/B Button Easily set timelapse path with start and end point settings for instant shooting.

Trigger Quickly start AI tracking, recenter the gimbal, and switch to sports mode and ultra-wide-angle shooting.

12-Hour Battery Life - Last Longer, Power Others

Enjoy a full day of uninterrupted shooting with reverse charging support, making it your phone's backup power source when needed.

*Data obtained when the gimbal is attached with iPhone 16 Pro Max, balanced and stationary in a 25°C environment. When using the AI tracker, the runtime is approximately 8 hours; with both AI tracking and maximum fill light brightness, it lasts around 3 to 4 hours.

Proficient Filming Partner - Keep It Professional

What's in the box?

- iSteady M7
- Advanced AI Tracker with Fill Light
- Detachable Touchscreen Remote Controller
- Tripod
- Carrying Case
- Storage pouch
