- 9-in-1 hot air styler for curls, waves and volume
- Digital motor for fast, gentle styling
- Ionic system and ProDure™ coating for smoother hair
- 3 heat settings, 3 speeds and 9 styling tools in one

PRODUCT DETAILS

Why settle for one look? AirLush 9-in-1 hot air multistylers gives you the freedom to create dazzling styles, whether you want your hair straight, curled or voluminous. The nine interchangeable attachments make it simple to switch up your routine and experiment with different looks and endless styling possibilities.

9 styling tools in one

Twist and click between 9 attachments to create the exact look you want – from soft waves to big volume and smooth lengths for every hair type.

Left and right turning air barrels – automatically attract and wrap the hair to create loose, bouncy curls and waves in seconds, without complicated wrist work.

Round brushes (50 mm big roll, 40 mm round, 33 mm round) – add volume and soft movement while you dry. Perfect for shaping, smoothing and taming bangs, layers and ends.

70 mm oval brush – ideal for root lift and full-bodied lengths. The long bristles guide air deep into the hair for extra body and control.

2 comb brushes: paddle brush & straightening brush – smooth, detangle and stretch the hair while you dry for sleek, polished everyday styles.

Round concentrator – focus the airflow for more precise styling or use AirLush as a classic hair dryer.

Flexible settings for personalised styling

With 3 airflow and 3 temperature settings, you can easily tailor the styling to your hair type and mood. Use lower heat and softer airflow for fine or fragile hair, or turn up the temperature and airflow for thick, long hair that needs more power.

Switch the temperature off for a burst of cool air to set your style and lock in shape and shine.

3 airflow settings: low, medium and high

3 temperature settings: low, medium and high, plus cool air when the temperature settings are off.

Fast, gentle styling with a digital motor

The brushless digital motor creates powerful, even airflow that styles your hair quickly without feeling harsh. You spend less time on styling, helping to reduce the risk of damage and leaving your hair feeling soft, smooth and comfortable to style day after day.

Produre™ – durable coating

Produre™ is Wilfa's innovative PFAS-free coating, offering protective and anti-frizz hair styling. Made from durable materials that do not degrade into microplastics or release harmful substances.

The coating maintains its smooth surface and protective qualities over time, without losing its easy glide effect, ensuring long-lasting quality on the product.

360° swivel cord for flexibility

Designed for flexibility, the 360° swivel cord makes styling easy from any angle without the cord twisting or getting in the way. With a 3-metre cord, you have more freedom to move, making it easier to style your hair where the mirror and light are best.

Use the hanging loop on the base of the cord for easy storage.

Practical travel bag

The included travel bag keeps everything organised at home or packed neatly in your weekend bag.

Long-lasting performance

To keep the airflow strong, AirLush has an automatic cleaning function that helps remove dust from the filter. With one long press of the temperature button, the multistyler runs a short cleaning cycle.

This simple step helps maintain powerful performance over time, so your styling routine feels just as effective, week after week.
