PRODUCT DETAILS

Compatible Apps
Connect your smartphone, tablet, or PC/Mac to start mixing. A number of software programs and apps - including WeDJ, djay, edjing Mix and rekordbox dj - are compatible with selected devices. You'll also have free use of all the features in WeDJ for iPhone that normally require in-app payments.

Compatible Streaming Sites
Depending on your app and device combo, you can mix sounds via streaming services including Beatport LINK, SoundCloud Go+, Deezer, and even Spotify.

Tutorial & Pop-Hint
Our updated WeDJ for iPhone app includes Tutorial and Pop-Hint features. They'll help you learn how to operate the controller, discover the basics of DJing including common DJ terms, and have you mixing in no time.

Transition FX
Just starting out behind the decks? Transition between tracks and make it sound professional with the Transition FX feature in WeDJ for iPhone. Choose from 11 effect styles and simply slide the crossfader to the other side to smoothly switch tunes.

Compact lightweight Body
The DDJ-200 is lightweight and portable. Leave the speakers at home and play sound from your smartphone, tablet, or PC/Mac's audio outputs. No outlet handy? No problem. Power the controller via an external battery.

Switch tracks naturally
Our Phrase Sync feature will analyse and align the positions of 2 tracks. As a result, it will sound natural when you switch between tunes.

Split output
While everybody else hears the master sound through the speakers, you'll be listening to and cueing the next track on your headphones. Simply plug and split cables to separate the audio.

Rekordbox dj
Simply connect the DDJ-200 to your PC/Mac to enable rekordbox dj. You don't need to enter a license key to use the software with the controller.
