JisuLife Kinderwagenventilator 3, Blauw

256620

Smart stroller fan with gentle, allday cooling and advanced safety features. Designed with up to 100 adjustable speeds and two wind modes, this portable stroller fan delivers everything from a soft natural breeze for naps to powerful airflow for outdoor walks. The 180° automatic oscillation ensures wide, even cooling, while the 5000mAh rechargeable battery provides up to 21 hours of runtime. Featuring a stable quadpod stand, detachable design for stroller or desktop use, dense safety grille, safety lock, night light, LED display, and integrated air filter, it offers reliable comfort and peace of mind wherever your baby rests.

PRODUCT DETAILS

100 Adjustable Speeds & 2 Wind Modes
This stroller fan features up to 100 precisely tuned speed levels, allowing you to easily adjust airflow to meet your baby's cooling needs. It offers two selectable wind modes: Natural Breeze Mode, ideal for soothing naps at home with a soft and gentle airflow, and Strong Wind Mode, perfect for outdoor stroller walks, delivering refreshing cooling relief from the heat.

180° Automatic Oscillation
The intelligent oscillation system provides wide-angle airflow up to 180°, ensuring even and consistent cooling coverage. Whether your baby is lying in a crib, sitting in a stroller, or playing on a mat, the gentle breeze maintains comfort without disturbance.

All-Day Comfort, 21H Cooling
Equipped with a built-in 5000mAh battery, this fan delivers up to 21 hours of continuous operation on a single charge. Whether traveling, camping, or enjoying a family outing, it ensures your baby stays comfortable throughout the day.

Unshakable Quadpod Stand
Designed with an extended four-leg base (compared to standard three-leg designs), this fan remains firmly stable on strollers, car seats, or baby cribs. Even during movement or active use, it stays secure and steady.

Detachable Design & Versatile Use
With a one-click detachable base and flexible mounting options, the fan easily transforms from a stroller fan into a desktop fan. It adapts effortlessly to different environments—strollers, dining tables, or bedrooms—offering maximum convenience and versatility.

Dense Grille & Safety Lock
The protective grille features openings smaller than 2.5 mm (vs. 5 mm in standard designs), effectively preventing tiny fingers from entering. A built-in safety lock further prevents accidental opening, ensuring enhanced protection. This makes it a safe and thoughtful gift for newborns and mothers.

Thoughtful Details & Meticulous Care
A 3-level soft night light gently illuminates nighttime feedings and diaper changes, while the LED display clearly shows battery level and wind speed. An integrated air purifier filter (includes one filter; replacements sold separately) continuously helps remove impurities, creating a fresher environment so your baby can breathe easily and rest comfortably—bringing peace of mind in every detail.

What’s in the box?

- Fan x1
- User Manual x1
- Type-C Charging Cable x1
