

Silk'n®

Silk'n FaceTite MultiPlatform

256755

Experience the future of anti-aging with FaceTite MultiPlatform. Combines RF, LED, and Near-Infrared technology to tighten skin and reduce wrinkles at home.

PRODUCT DETAILS

The cutting-edge FaceTite MultiPlatform is the future of non-surgical skin rejuvenation. It not only combines three professional technologies into one treatment but also offers multiple interchangeable platforms, allowing you to seamlessly adapt your routine to support your skin's specific needs at any given time.

Why the FaceTite MultiPlatform Changes Everything:

- **Advanced 3-in-1 Base Technology:** The built-in small RF platform integrates Near-Infrared (IR), red LED light, and Bipolar Radio Frequency (RF) energy. It is perfectly scaled to treat difficult-to-reach zones such as crow's feet and deep nasolabial folds.
- **Extra-Large RF Attachment:** Creates an expanded treatment surface specifically engineered for the face, neck, and décolletage. It intensely targets fine lines and wrinkles while fading sun and age spots by boosting structural collagen and elastin fibers.
- **Targeted EMS Attachment:** Employs Electrical Muscle Stimulation (EMS) to generate mild micro-currents that workout underlying facial muscles, improve microcirculation, and safely reduce fluid retention in larger areas like the cheeks and jawline.
- **Built-In Heat Stabilizer:** Features an advanced thermal sensor that automatically pauses the warming energy the moment skin temperature reaches 43°C and gently resumes as it cools, ensuring an ultra-safe treatment that never overheats.
- **Personalized Power Controls:** Equipped with four distinct energy intensity levels, giving you the complete flexibility to scale your clinic-grade treatments up or down to match your absolute comfort level.

Salon Technology Made Simple:

The Silk'n FaceTite MultiPlatform brings authentic clinical innovation directly into your home. For ultimate convenience on the go, the entire system packs away neatly into a luxury storage case, custom-molded to hold your multiplatform device, the included Slider Gel, the charging adapter, and your interchangeable styling attachments.
